Document	Page Count	Sequence	Edit	Build	
Budget	2	1	Edit	Build	This section allows you to assemble the final proposal. All of the necessary components should have been generated from the system into PDF documents or uploaded and converted (if necessary) into PDF documents.
Budget Page	1	2			The first step is to indicate which "sequence" you would like the components to be assembled in. A default order has been set, but you may choose a different sequence if you like.
Personnel Report	1	3			You may also indicate which pages you would like numbers to appear on the bottom of, and what the starting point is for those numbers. If you do not want sections to be numbered, leave the box for that section blank. Page numbers are sequential within a given section.

The "Build" button will construct one composite document based upon the preferences you indicated. Please review this document carefully. This is your final proposal. If there are problems with the proposal, please correct them at this point. Sequencing or page numbering problems may be corrected from this screen. Other problems may require you to visit that section of the proposal and make changes. It will be necessary to "un-check" the completed sections in order to make changes. You may build the proposal as many times as you need to. Only the final version will be saved.

Once your proposal has been completed, it can be electronically routed internally for necessary approvals. This page will display in two modes: Un-submitted and Submitted.

The screen is in **Un-submitted** mode when your proposal has not yet been routed. You can determine this by visually identifying a "thumbs up" on the screen. If it is there, then the proposal has not yet been submitted.

The screen is in **Submitted** mode when your proposal has been submitted and you can see the approval path it is on. Your Administrators have configured the approval path that they feel is appropriate for your proposal. If you have any questions regarding this process, please contact them.
