HRÉTIEN INTERNATIONAL RESEARCH GRANTS

American Astronomical Society

Description:

The American Astronomical Society invites applications for the Chrétien international research grants. These grants are intended to further international collaborative projects in observational astronomy. The emphasis is on long-term international visits and the development of close working relationships with astronomers in other countries. Preference will be given to individuals of high promise who are otherwise unfunded. Innovative technical approaches including the development and use of new optics, new devices and new techniques will count heavily in the applicant's favour.

Astronomers with a PhD or equivalent may apply; graduate students are not eligible. Up to US\$20,000 will be awarded to one or more individuals or groups to be used for the support of international observational astronomy. The awards are open to astronomers throughout the world.

Closing date: 01 Apr 16 (Forecast)

Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

Posted date: 01 Mar 12

Award type: Directed grants for individual investigators, Access to laboratories, telescopes etc., Travel for research purposes

Award amount max: \$20,000

Description:

The Biochemical Society invites applications for the Eric Reid fund for methodology. Funding supports benchwork, with an emphasis on methodology and preferably cellular or bioanalytical work. Examples of supported activities include:

 feasibility studies by new staff prior to application to a major funding body;

- developing a new technique;
- checking the application of a known technique in new circumstances.

Applicants must be either early-career, full or emeritus members of the society. Where a short-term stipend is sought, applicants must be engaged in benchwork and not just writing-up.

Grants are worth up to £1,250 each, or up to £2,000 if vacation help is required.

Closing date: 01 Apr 16

Deadline information: Deadlines on: 1 April 2016, 1 November 2016, and repeated

annually.

Posted date: 20 Nov 15

Award type: Innovation grants, Directed grants for individual investigators

Description:

The Cystic Fibrosis Foundation invites letters of intent for its research grants. These aim to the development of encourage new information that contributes to the understanding of the basic aetiology and pathogenesis of cystic fibrosis. Priority will be placed on those projects proposing to better understand the mechanisms behind disease pathophysiology and to develop strategies to prevent or treat it. All proposals must be hypothesis-driven and sufficient preliminary data must be provided to justify foundation support. Information derived from such study will hopefully lead to submission to other funding agencies. Studies may be carried out at the sub-cellular, cellular, animal or patient levels. Funding of US\$90,000 per year is available for two years, after which a grant may be renewed for another year.

Closing date: 01 Apr 16 (Forecast)

Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

ILOT AND FEASIBILITY AWARDS Cystic Fibrosis Foundation

Description:

The Cystic Fibrosis Foundation invites letters of intent for its pilot and feasibility awards. These grants are for developing and testing new hypotheses or new methods and to support promising new investigators as they establish themselves in research areas relevant to cystic fibrosis. Proposed work must be hypothesis-driven and must reflect innovative approaches to critical questions in cystic fibrosis research. Up to US\$40,000 per year for two years may be requested.

Closing date: 01 Apr 16 (Forecast) Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

AKESHI MUROFUSHI RESEARCH AWARD

International Association of School Librarianship

Description

The board of the International Association of School Librarianship invites applications for the Takeshi Murofushi research award. This award of US\$500 is intended to go towards funding a research project into school librarianship. Preference will be given to proposals involving researchers from more than one country who are members of the association and to members of the association. Projects should be of international interest.

ONSTANT H JACQUET RESEARCH AWARDS

Religious Research Association

Description:

The Religious Research Association invites applications for the Constant H Jacquet research awards. These small research grants primarily support applied, client-centred projects, but basic research is also regularly funded. The association's committee especially encourages proposal submissions from scholars who are in the early stages of

their careers, as well as proposals from students.

Applicants are required to be members of RRA. Full-time students may join the association at the time of their application. All others must hold membership in RRA for at least one full year prior to the application deadline.

The total funding amount in 2013 is US\$18,000, with individual grants usually not exceeding US\$4,000. Funds may be used for research expenses and release time, but not supplemental income capital equipment.

Closing date: 01 Apr 16 (Forecast) Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is

repeated once a year. Posted date: 11 Mar 09

CUTE MEDICINE RESEARCH PROJECT GRANTS

Laerdal Foundation

Description:

The Laerdal Foundation for Acute Medicine invites applications for its acute medicine research project grants.

These support projects within acute medicine. Projects should comprise one or several of the following elements:

- experimental or clinical research;
- diagnosis;
- treatment and transport of patients with acute life threatening disease or trauma;
- development or accomplishment of education.

Preference will be given to projects connected with out-of-hospital acute medicine or with special practical significance.

Closing date: 01 Apr 16

Deadline information: Deadlines on: 1 April 2016, 1 October 2016, and repeated annually.

AVID NICHOLLS RESEARCH BURSARIES

 $Society\ for\ Caribbean\ Studies$

Description:

The Society for Caribbean Studies invites applications for the David Nicholls research bursaries. These support research and field work on the Caribbean. Two types of bursaries are available:

- a bursary, worth up to £1,500, for postgraduate students in the UK or overseas, who are preparing a dissertation or thesis on the Caribbean and who can benefit from access to the David Nicholls memorial library in Oxford;
- a bursary, worth up to £1,500, for postgraduate students from UK institutions to pursue field work in the Caribbean, spending at least two weeks abroad.

Applications for the first bursary are particularly welcome from students in the Caribbean.

Bursaries cover travel and subsistence in Oxford or the Caribbean.

Closing date: 01 Apr 16

R

ESEARCH VISIT GRANTS

Society for General Microbiology

Description:

The Society for General Microbiology invites applications for its research visit grants. These enable researchers from the UK or Republic of Ireland to visit another laboratory worldwide, or international researchers to visit a laboratory in the UK or ROI, to carry out a defined piece of microbiology research, whether within an established or new collaboration initiative.

Applications are open to members of the society who fall into one of the following categories:

- registered for a PhD or are PhD qualified and employed in a postdoctoral research position in a university, hospital or research institute worldwide;
- a university lecturer within three years of appointment to their first post in the UK or Republic of Ireland.

Grants are worth up to £3,000 each for visits lasting four weeks to three months. Funds may be used to contribute to travel, accommodation and subsistence costs in making the visit, or towards the costs of project consumables.

Closing date: 01 Apr 16

Deadline information: Deadlines on: 1 April 2016, 1 October 2016, and repeated annually.

RONWY HANKEY MEMORIAL FUND FOR AEGEAN STUDIES

British School at Athens

Description:

The British School at Athens invites applications for the Vronwy Hankey

memorial fund for Aegean studies. This helps with expenses relating to research in the

prehistory of the Aegean and its connections with the east Mediterranean. Eligible expenses include attending conferences to present papers, photography, and travel to museums and sites.

Preference may be given to younger students.

Grants are unlikely to be worth more than £1,000 and can be used towards the maintenance costs of longer stays at museums and other study centres so as to achieve work that would not otherwise have been attempted.

Closing date: 01 Apr 16

Deadline information: This call is repeated

once a year.

Posted date: 03 Aug 15

CIENTIFIC OCEAN DRILLING RESEARCH Integrated Ocean Drilling Program

Description:

The Integrated Ocean Drilling Program announces the availability of funds for scientific ocean drilling research. Individual scientists or groups of scientists with a new idea for scientific ocean drilling may submit preliminary proposals. Preliminary proposals should:

- state the scientific objectives and explain how those objectives relate to, or advance beyond, the IODP initial science plan;
- justify the need for drilling to accomplish the scientific objectives;
- present a well-defined strategy for addressing the scientific objectives

- through drilling, logging, or other down-hole measurements;
- describe the proposed drill sites, penetration depths, expected lithologies, and available site-survey data;
- describe briefly any relationships to other international geoscience programs.

Closing date: 01 Apr 16 (Forecast)

Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. Deadline: 23:59pm GMT April 1 and October 1 annually \otimes

IDS CARE NURSING GRANT

Sigma Theta Tau International

Description:

Sigma Theta Tau International and the Association of Nurses in Aids Care invite applications for their Aids care nursing grant. This aims to encourage research career development of nurses through support of clinically oriented HIV/Aids research, and to increase the number of HIV studies done by nurses. This includes studies focused on HIV prevention, symptom management, promotion of self-care and adherence. Proposals for pilot or developmental research may also be submitted.

Applicants must be registered nurses with a current license and they must hold a master's degree or be enrolled in a doctoral programme. Membership of one organisation is required, and preference will be given to members of both STTI and ANAC.

One award, worth up to US\$2,500, is available for one year.

IGMA THETA TAU INTERNATIONAL/MIDWEST NURSING RESEARCH SOCIETY RESEARCH GRANT Sigma Theta Tau International

Description:

Sigma Theta Tau International and the Midwest Nursing Research Society invite applications for their research grant. This encourages qualified nurses to contribute to the advancement of nursing through research.

Proposals for pilot or developmental research may be submitted, and all research topics and designs are eligible for support. Multidisciplinary, historical and international research is encouraged.

Applicants must be registered nurses with a current license and hold a master's degree or be enrolled in a doctoral programme. Preference will be given to STTI and Hospice and Palliative Nurses Foundation End of Life Nursing Care members.

One grant, worth up to US\$2,500, is available. The project must be completed within one vear.

Closing date: 01 Apr 16

Deadline information: This call is repeated

once a year.

Description:

Sigma Theta Tau International and the Association of periOperative Registered Nurses invite applications for perioperative nursing grant. This enables qualified nurses to conduct research related to practice and perioperative nursing contribute development to the perioperative nursing science. All relevant research topics will be considered although priority will be given to research that relates to the following topics:

perioperative nursing care that contributes to quality, cost-effective patient outcomes related to safety, physiological integrity and behavioural responses;

- validation, testing and refinement of the perioperative nursing data set;
- evidence-based practice;
- perioperative nursing leadership or management;
- health and safety issues affecting perioperative nurses and patients;
- recommended practices.

The principal investigator must be a registered nurse, have at minimum a master's degree in nursing, and either work or have interest in the perioperative nursing practice. Membership in either organisation is acceptable but not required.

One award of up to US\$5,000 is available.

MALL EXPLORATORY GRANT Scoliosis Research Society

Description:

The Scoliosis Research Society applications for a small exploratory grant. This grant is designed specifically for new investigators who have a preliminary concept they would like to develop into a research project. Applicants do not need to be members of the society to apply. The society has identified the following areas important research topics:

- evidence based medicine;
- idiopathic scoliosis;
- aetiology;
- non-op and operative treatment;
- 3D deformity of the spine and thorax;
- adult deformity;
- treatment and outcomes;
- osteoporosis, in particular osteoporotic spine fractures, its impact on scoliosis kyphosis management, and how it relates to spinal deformity and instrumentation;

- early onset scoliosis treatment;
- sagittal imbalance;
- congenital scoliosis;
- neuromuscular spinal deformity;
- deformity and reconstruction arising spine and from sacral tumour treatment;
- thoracic insufficiency associated with spinal deformity in children;
- pulmonary outcome sequeallae following common natural history of spine deformity treatment and history.

The maximum grant award for this category is US\$10,000. The maximum duration of research is one year.

Closing date: 01 Apr 16

Deadline information: Deadlines on: 1 April 2016, 1 October 2016, and repeated annually.

Scoliosis Research Society

Description:

The Scoliosis Research Society invites applications for a standard investigator grant. These grant applications may be in any area of spinal deformity research, although an additional funding source for grants focusing on the aetiology of scoliosis is available in conjunction with the Cotrel Foundation. Applicants do not need to be members of the society to apply. These applications require evidence that the investigator has the appropriate experience and resources.

The society has identified the following areas as important research topics:

- evidence based medicine;
- idiopathic scoliosis;
- aetiology;
- non-op and operative treatment;
- 3D deformity of the spine and thorax;
- adult deformity;

- treatment and outcomes;

NOWLEDGE EXCHANGE PROGRAMME

Scottish Universities Insight Institute

Description:

The Scottish Universities Insight Institute invites registrations for its knowledge exchange programme. Funding programmes that address substantial issues facing Scotland and the wider world, which have the capacity to extend knowledge and inform policy and practice. Proposals should:

- marshal the existing knowledge of participants and deploy their experience in fresh ways;
- be multi-disciplinary and incorporate policy-maker and practitioner knowledge;
- foster ongoing collaboration through a schedule of activities over a number of months;
- demonstrate the capacity to extend knowledge and inform policy and practice.

Organising teams must include members from at least two of the institute's partner universities. The institutions participating in this call are: Dundee, Edinburgh, Glasgow School of Art, Heriot Watt, St Andrews, Stirling, Strathclyde. Programme leadership must also include relevant individuals from non-academic sectors, such as industry, third sector, public sector, government and policy makers. Academic leaders should have at least five years' postdoctoral standing and non-academic leaders should have at least five years' professional experience in their domain of expertise.

Programmes typically comprise seminars and workshops held over a period of up to six months. Funding is awarded to cover the cost of hosting these events and enabling participation of key individuals.

Closing date: 01 Apr 16

Deadline information: Registrations due by 1 April; full proposals due by 13 May 2016.

ESEARCH GRANTS Cactus and Succulent Society of America

Description:

The Cactus and Succulent Society of America invites applications for its research grants. The grants support research on succulent plants. General research topics include:

- discover new species or forms;
- ecological associations;
- increase knowledge of taxonomy, nomenclature, and biogeography;
- relating to all aspects of cultivation, artificial propagation and mass production;
- relating to conservation of threatened or endangered species;
- basic biology, such as morphology and physiology, especially as these relate to the needs and interests of hobbyists.

The grants are open to to all applicants without regard to gender, age, nationality, or affiliation.

Typical awards range up to \$1,200-\$1,500.

Closing date: 01 Apr 16 (Forecast)
Deadline information: !! Call has not yet
been announced by funder, but this is the

TUDENT RESEARCH GRANTS American Hemerocallis Society

Description:

The American Hemerocallis Society invites applications for its student research grants.

The grants support graduate or undergraduate students or faculty/staff using

daylilies (plant genus Hemerocallis) as experimental organisms in original research projects. Fundamental areas of investigation are encouraged, such as:

- banded chromosome preparations;
- gene mapping;
- fine structural studies of vegetative or reproductive parts;
- microscopic analysis of the ontogeny of flower scapes in the crown;
- effect of various hormones on plant growth and formation of proliferations on scapes.

Practical areas of study are encouraged, such as:

- hardiness of various cultivars in different climatic zones;
- use of microtubule degradants (eg, trifluralin, oryzalin, amiprophosmethyl) to produce polyploids;
- seed dormancy factors;
- pests and diseases (eg, crown rot, spring sickness, bulb mites, gall midge, daylily rust).

The grants are up to \$3,000 per year. Grants are renewable for a total of three years.

Closing date: 01 Apr 16

ESEARCH PROJECTS Dutch Duchenne Parent Project NL

Description:

The Dutch Duchenne Parent Project NL invites applications for its research projects. These support research into finding a cure for Duchenne muscular dystrophy. DPP NL sponsors promising research and fellowships, faster exchange of data and international collaboration. DPP NL operates a multi-track

policy: the widest possible range of research should be covered as it is not possible to say which research will lead to the ultimate solution.

Researchers from all countries are eligible to apply.

Funding is available for a maximum of two years, and proposals should be submitted in English. DPP NL does not fund overhead expenses.

NTERNATIONAL DEVELOPMENT FUND

Society for General Microbiology

Description:

The Society for General Microbiology invites applications for its international development fund. This enables members to travel to countries where microbiology is inadequately developed but where its further development may assist education or the economy of these countries.

Applications are open to full or full concessionary members who have made at least two consecutive membership subscription payments. International associate members who have been members for two subscriptions years and who are resident in a low- or lower-middle-income country may also apply.

Funding may be used for the following purposes:

- travel, accommodation, consumables and equipment costs for short lecture or laboratory training visits in low- or lower-middle income countries;
- to support national microbiological facilities with culture collections or similar needs when they run into temporary difficulties;
- any other small project to assist in technology transfer from developed countries to developing countries.

Awards are worth up to £5,000 each.

Closing date: 01 Apr 16

LF NACHEMSON EVIDENCE BASED MEDICINE GRANT

Scoliosis Research Society

Description:

The Scoliosis Research Society invites applications for its Alf Nachemson evidence based medicine grant grant. These awards are given to studies that aim to provide the best available evidence by which to improve our knowledge and practice in the care of patients with spinal deformities. Applicants do not need to be members of the society to apply. These applications require evidence that the investigator has the appropriate experience and resources.

The society has identified the following areas as important research topics:

- evidence based medicine;
- idiopathic scoliosis;
- aetiology;
- non-op and operative treatment;
- 3D deformity of the spine and thorax;
- adult deformity;
- treatment and outcomes;
- osteoporosis, in particular osteoporotic spine fractures, its impact on scoliosis kyphosis management,

- and how it relates to spinal deformity and instrumentation;
- early onset scoliosis treatment;
- sagittal imbalance;
- congenital scoliosis;
- neuromuscular spinal deformity;
- deformity and reconstruction arising from spine and sacral tumour treatment;
- thoracic insufficiency associated with spinal deformity in children;
- pulmonary outcome sequeallae following common natural history of spine deformity and treatment history.

This grant is awarded a maximum of US\$25,000 per year for up to two years, the maximum total award being US\$50,000.

TRATEGIC PARTNERSHIP GRANTS FOR PROJECTS

Natural Sciences and Engineering Research Council of Canada – Conseil de Recherches en Sciences Naturelles et en Génie du Canada

Description:

The Natural Sciences and Engineering Research Council of Canada invites applications for its strategic partnership

grants for projects. These support early-stage project research in targeted areas in order to enhance Canada's economy, society and

environment. Applications are only accepted in the target areas of advanced manufacturing, environment and agriculture, information and communication technologies or natural resources and energy, with a focus on clean technologies and the impacts of climate change.

Each project must include at least one academic researcher and at least one supporting organisation that is actively involved in all stages of the project. Eligible organisations are Canadian-based companies or government organisations. Applicants are encouraged to incorporate international collaborations into their proposals. Priority will be given to applications that address the research topics identified in each target area.

The total budget is expected to be approximately CA\$12 million for the first year of the projects, which could fund about 15 to 18 new awards in each target area. The duration of each project may be from one to three years.

Closing date: 01 Apr 16

Deadline information: This call is repeated

ESEARCH GRANTS European Society of Human Reproduction and Embryology

Description:

The European Society of Human Reproduction and Embryology invites proposals for its research grants. These enable scientists and clinicians to undertake basic and clinical research in the field of in reproductive medicine, with a special focus on the theme of endometrial receptivity. Funding supports pilot and feasibility studies, preliminary data collection, analysis of existing data, small research projects and the development of new research technology.

Proposals that are interdisciplinary, pioneering, address new and emerging fields of research, or those that introduce unconventional, innovative approaches and scientific inventions, are encouraged.

Applicants must be members of the society working in the field of reproductive medicine and biology, and may be of any nationality. Projects must be carried out by a coordinator and at least one associated investigator. A maximum of six associated investigators may be included in each application. Collaboration between research groups is encouraged.

Two grants are available; one worth €50,000, and the other worth €150,000 over three years.

Closing date: 01 Apr 16

Deadline information: Proposals due by 11.59pm CET. This call is repeated every 2

years.

Description:

The Society for French Studies invites applications for its research support. Funding supports advanced research in the field of French studies, including activities such as presentation of papers at conferences, expenses incurred through travel to libraries and archives necessary for research, and other costs incurred in the completion of the research.

Postgraduates, early-career researchers without permanent positions or who are within five years of obtaining their PhDs, and active scholars who have retired from permanent posts may apply. Applicants must also be members of the society. Priority may be given to early-career scholars and postgraduates.

Applicants should demonstrate some connection with the UK or Ireland, either through the applicant's affiliation to a UK or Irish HEI, or in the case of overseas members,

by the proposed project's contribution to the UK or Ireland.

Grants normally range between £100 and £300 each, although grants of up to £500 each may be awarded. The total budget is worth up to £6,000 per year for three years.

Closing date: 01 Apr 16

Deadline information: Deadlines on: 1 April 2016, 1 September 2016, 1 January 2017, and repeated annually.

Posted date: 04 Jan 16

Award type: Directed grants for individual investigators, Publish, edit, translate,

disseminate, Travel to conferences, meetings

ALL FOR PARTNERSHIP CONCEPT PAPERS IN SUPPORT OF POWER AFRICA

Agency for International Development (USAID)

Description:

The Agency for International Development (USAID) invites partnership concept papers in support of Power Africa. This aims to develop activities or projects that can pool funds, talent, and resources from USAID, other government agencies, and private sector partners to support Power Africa. Alliances formed will focus primarily on the following programmatic areas:

- financing strategies for power production;
- late stage power sector transaction support;
- small-scale power projects and rural electrification/mini-grids support;
- power sector regulatory and institutional strengthening and policy reform;
- power sector training, mentoring, networking and internships;

- \otimes
 - power sector risk mitigation strategies;
 - development or piloting of innovative energy technologies.

Businesses, universities, NGOs, government institutions and foundations who are working within sub-Saharan Africa may apply.

One to three partnerships per year are available. Funding per partnership is worth between US\$250,000 and US\$5 million over two to five years.

TLANTIC REGION RESEARCH GRANTS

Canadian Breast Cancer Foundation - Fondation Canadienne du Cancer du Sein

Description:

The Canadian Breast Cancer Foundation, under its Atlantic regional programme, invites applications for its research grants. These support Atlantic-based breast cancer research that advances the foundation's vision of a future without breast cancer.

Principal applicants must be Canadian citizens or permanent residents who are affiliated with an Atlantic Canadian postsecondary organisation, a hospital or research institute in Atlantic Canada, or a non-governmental or non-profit organisation with a defined research or knowledge translation mandate in the Atlantic region. Trainees, postdoctoral fellows and research

assistants or associates may contribute as coapplicants. In addition, collaborators from within or outside the Atlantic region as well as technicials or research associates may be included in applications.

Grants are worth up to CA\$50,000 per year for up to three years. Funding may be used to cover supplies, consumables, services, salaries, training stipends and knowledge translation. Up to CA\$3,000 per year is available for conferences and related travel to present research findings and up to CA\$2,500 is awarded for publication costs.

Closing date: 02 Apr 16 (Forecast)

USTRALIA-CHINA COUNCIL GENERAL FUNDING GRANTS

Department of Foreign Affairs and Trade

Description:

The Australian Department of Foreign Affairs and Trade invites applications for the Australia-China Council general funding grants. These support projects across China, Hong Kong, Taiwan, Macau and Australia that broaden and strengthen Australia-China relations in education, business, culture and arts. Priority will be given to projects under the following themes:

- education projects that support practical and effective solutions to enhance China literacy, business and cultural capabilities of Australian institutions and people to effectively engage with China and promote education and knowledge connectivity between the two countries;
- economic diplomacy projects that promote diversity, growth and

- innovation of Australia's trade investment relationship with China;
- arts and culture projects that showcase Australian arts and creative industries to Chinese audiences and build closer and broader cultural and artistic partnerships.

The activities in the above areas should focus on mobility, capabilities and new areas of engagement.

Individuals and organisations may apply. Individual applicants must be an Australian citizens or permanent residents. Joint applications may be accepted from non-Australian individuals or organisations who are working in partnership with Australian individuals, groups or organisations. Australian individuals or organisations should be the main applicant.

The grants are worth up to AU\$40,000, but in exceptional circumstances the level of funding may be increased. The grants are intended to be seed funding to encourage partnerships with other areas of government, corporate sponsors and private donors, and applicants will normally be expected to demonstrate that they are seeking assistance from other sources.

Closing date: 04 Apr 16

Deadline information: Applications are invited between 9am, 1 February and 12 noon Canberra time, 4 April 2016. This call is repeated once a year.

YSTEMS BIOLOGY APPROACHES IN HIV OR AIDS AND SUBSTANCE USE (R01)

NIH: National Institute on Drug Abuse

Description:

The National Institute on Drug Abuse invite applications for its systems biology approaches in HIV or Aids and substance use (R01) funding opportunity announcement. This announcement supports systems biology that address critical research projects questions in HIV or Aids research in the context of drugs of abuse. Understanding the complex biological intersection of HIV or Aids and substance use and abuse is the central theme of this call. Applications must address the following key points:

 investigate high priority research areas in HIV biology relevant to either US or international populations;

- applicants must use a systems biology approach;
- at least one aim or sub-aim must involve exposure to substances of abuse or analysis of samples from patients exposed to a drug of abuse.

Substances of abuse of interest include nicotine, alcohol, cocaine, stimulants, opioids, abused prescription drugs, cannabinoids or combinations of these drugs.

Eligible applicants include US and foreign forprofit or non-profit organisations and public or private institutions.

The NIDA intends to commit US\$3 million in fiscal year 2016 to fund five to eight awards. Application budgets are not limited but need to reflect the actual needs of the proposed project. The maximum project period is five years.

Ref: RFA-DA-16-013 (replaces RFA-DA-12-009).

2020-LCE-2016 COMPETITIVE LOW-CARBON ENERGY - TOPICS 1, 2, 3, 26, 32, 33, 34 Horizon 2020: Societal Challenges

Description:

The European Commission Horizon 2020: Societal Challenges, under the secure, clean and efficient energy work programme, invites proposals for its H2020-LCE-2016 competitive low-carbon energy call. Proposals may address the following topics:

towards an integrated EU energy system, including LCE-1-2016 next generation innovative technologies enabling smart grids, storage and integration energy system increasing share of renewables distribution network, LCE-2-2016 demonstration of smart grid, storage and system integration technologies with increasing share of renewables distribution system, LCE-3-2016

- support to R&I strategy for smart grid and storage;
- enabling the decarbonisation of the use of fossil fuels during the transition to a low-carbon economy, including LCE-26-2016 cross-thematic ERA-NET on applied geosciences;
- social, economic and human aspects of the energy system, including LCE-32-2016 European platform for energyrelated social sciences and humanities research;
- supporting the development of a European research area in the field of energy, including LCE-33-2016 European common research and innovation agendas in support of the implementation of the SET action plan, and LCE-34-2016 joint actions

towards the demonstration and validation of innovative energy solutions.

Proposals must take the form of research and innovation actions, innovation actions, coordination and support actions or ERA-NET cofund actions, depending on the topic. Research and innovation actions, innovation actions and ERA-NET cofund actions require participation by at least three independent legal entities, each established in a different EU member state or associated country. Coordination and support actions require participation by at least one legal entity established in a member state or associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Each successful proposal is expected to receive between €1 million and €15m although proposals for other amounts will also be considered. The total indicative budget for this call is €149.96m.

Ref: OJ C6776.

ORMAN E BORLAUG LEADERSHIP ENHANCEMENT IN AGRICULTURE PROGRAMME

Agency for International Development (USAID)

Description:

The University of California at Davis and the US Agency for International Development invite applications for the Norman E Borlaug leadership enhancement in agriculture programme. This aims to enhance the quality of thesis research of graduate students from sub-Saharan Africa who show strong promise as leaders in the field of agriculture and related disciplines. The programme supports research on all topics related to the US government's global hunger and food security initiative, Feed the Future, although emphasis is placed on work of relevance to the national development of the student's home country. Internships are tenable for up to 12 months and may be held at a US graduate-level university, a Consultative Group International Agricultural Research centre, or a combination of appropriate institutions.

Citizens of USAID-assisted countries in sub-Saharan Africa, who are currently enrolled as a master's or PhD student at a US or sub-Saharan university, may apply. Applicants must have completed at least one year of graduate-level coursework in the programme in which they are enrolled and be fluent in reading, writing and speaking English.

Funding supports a variety of research needs, such as travel to the research site, research support at the host institute and US faculty member travel to the research site for mentoring purposes. Funds may not be used

for tuition fees or salaries. Grants are worth up to US\$20,000 each.

NVENTION FOR INNOVATION (141) PROGRAMME - OBESITY THEMED CALL Department of Health including NIHR

Description:

The National Institute for Health Research invites applications for its themed call on the prevention and treatment of obesity, under the invention for innovation (i4i) programme. Funding supports research-based evidence to underpin the prevention and management of overweight and obesity in adults and children. Issues of particular importance for this call include the prevention of type 2 diabetes and increasing levels of physical activity.

The i4i programme supports collaborative R&D projects that have demonstrated proofof-principle and have a clear pathway towards adoption and commercialisation. It also aims to advance healthcare technologies and interventions for increased patient benefit in areas of existing or emerging clinical need.

Lead, co- and collaborative applicants must be based in England or Wales only. Non-English or Welsh organisations may act as non-grant receiving collaborators.

Closing date: 06 Apr 16 Deadline information: Stage one applications due by 1pm, 6 April; stage two applications are invited between 20 July and 1pm, 14 September 2016.

¬ NERGY TECHNOLOGY DEVELOPMENT AND DEMONSTRATION PROGRAMME **↓** Energistyrelsen – Danish Energy Authority

Description:

The Danish Energy Authority invites applications for its energy technology development and demonstration programme. This programme supports the development and demonstration of energy technologies, as well as collaboration between public and involvement private actors and international activities within the area. Projects must support the Danish energy policy objectives, with respect to climate and energy policy, and have clear commercial potential. Eligible technology areas include the following:

- biomass technologies, including for transport;
- wind energy and other renewable energy technology;
- hydrogen and fuel cell technologies;
- low energy buildings;
- energy efficient solutions, including final consumption and flexible energy consumption;
- combined energy systems, including transport of energy;
- more efficient methods for production of oil and gas;
- other more efficient and environmentally-friendly production, including CO2 storage.

Public and private enterprises or knowledge institutions are eligible to apply, including universities and approved technological service institutes. Foreign participants may be co-funded by the programme, provided they contribute to the advancement of technological development in Denmark, and provided that the commitment holding company is registered in Denmark.

There is no fixed amount limit on support within the programme, however, for development- and demonstration projects a minimum of 50 per cent self-financing is encouraged.

OSTGRADUATE SCHOLARSHIP FOR AN OUTSTANDING RESEARCHER

Institution of Engineering and Technology

Description:

The Institution of Engineering and Technology invites applications for its postgraduate scholarship for an outstanding researcher. This aims to help researchers share knowledge throughout the global science, engineering and technology community by assisting students undertaking a doctorate for research in engineering or technology internationally.

The scholarship is open to members who are postgraduate students in any year of study undertaking research in any country. Candidates must have achieved a 2:1 or higher in their first degree.

The scholarship is worth £10,000 and is tenable for one year.

Closing date: 07 Apr 16 Deadline information: Applications are due by 5pm BST. This call is repeated once a year.

Posted date: 18 Jan 16

Award type: Predoctoral fellowships, Directed grants for individual investigators Award amount max: £10,000

Goethe Institute

Description:

The Goethe Institute and Institute for Advanced Study in Humanities (KWI) invite applications for their scholars in residence programme. This programme will provide scholars with opportunities to pursue joint projects with German academics working on similar issues. This year's programme will

focus on the links between culture and climate, economics and conflict. International scholars will travel to Germany from 15 October 2013 for six to eight weeks. The German scholar will travel to their partner's country from 1 January 2014. Applicants must be fluent in English and be either PhD

students or postdoctoral researchers from the humanities, cultural and social science sectors. Funding includes round-trip tickets to the host country, accommodation in the host country and a daily allowance of €530 a week.

Closing date: 08 Apr 16 (Forecast) Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

ISEGRAD SCHOLARSHIPS AT THE OPEN SOCIETY ARCHIVES International Visegrad Fund

Description:

The International Visegrad Fund invites applications for the Visegrad scholarships at the open society archives. These enable investigators to conduct research at the Open Society Archivum in Budapest. Projects should address fields relevant to the archive's

holdings, such as information science during the Cold War and the nature of propaganda.

12 fellowships are awarded annually to applicants from V4 countries, which are Czech Republic, Hungary, Poland and Slovakia. Three fellowships are available

annually for non-V4 applicants. Applications should be submitted in English.

Scholarships provide €2,000 towards access to the archives, as well as travel to and from Budapest, and subsistence and accommodation for up to two months.

Closing date: 10 Apr 16

Deadline information: Deadlines on: 10 April 2016, 15 October 2016, 10 January 2017,

XTENDED DEADLINE: TUSK CONSERVATION AWARDS Tusk Trust

Description:

The Tusk Trust has extended the deadline for nominations for its Tusk conservation awards. The deadline has been extended from 6 February to 10 April 2015. All other call details remain unchanged.

These recognise inspirational conservation work in Africa, ranging from the protection of endangered species and threatened habitat to the promotion of environmental education and the development of community driven conservation. Two awards are available:

 the Prince William award for conservation in Africa, awarded to a distinguished individual for their

- dedication and contribution to conservation in Africa;
- the Tusk conservation award, recognises an up-and-coming conservationist whose work has already demonstrated an exceptional commitment to conservation and has made a significant impact to date.

Winners receive a grant to further their work.

Closing date: 10 Apr 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

EADLINE BROUGHT FORWARD: COUNCIL FOR AUSTRALIAN-ARAB RELATIONS GRANTS

Department of Foreign Affairs and Trade

Description:

The Australian Department of Foreign Affairs and Trade, through its Council for Australian-Arab Relations, has brought forward the applications for its grants. The previous deadline of 26 April has been brought forward to 11 April 2016. All other details remain unchanged. ***

These grants support projects that enhance Australia's economic, cultural and social relations with the Arab world. Proposals should address the following strategic objectives of the council:

- to support robust professional, community and institutional linkages between Australia and the Arab world that will promote mutual understanding and project positive, accurate and contemporary images of each other's societies;
- to promote productive partnerships between Australia and the Arab world

on contemporary issues of shared interest, particularly in the fields of science, technology, the environment and social development initiatives such as health and sport;

- to raise public and corporate awareness of the importance of the Australian-Arab relationship;
- to support increased business and trade between Australia and Arab countries.

Applications must also serve a CAAR flagship programme or address a CAAR priority sector, which includes education, food security, resources and energy, transport and infrastructure, health and financial services.

Both individuals and organisations may apply for grants. Individual applicants must be Australian citizens or permanent residents. Joint applications may be accepted from non-Australian citizen and resident individuals or

organisations who are working in partnership with Australian individuals, groups or organisations, where this promotes Australian-Arab relations.

The level of funding will be decided according to the merits of the proposals, but funding will generally be above a minimum of AU\$10,000 per grant. CAAR encourages applicants to seek funding for their project from other sources.

Closing date: 11 Apr 16

Deadline information: Applications are invited between 1 February and 1pm AEST,

11 April 2016.

RANSNATIONAL CALL ON PHOTOVOLTAICS (PV4) ERA-NET SOLAR-ERA.NET

Description:

SOLAR-ERA.NET invites proposals for its fourth transnational call on photovoltaics (PV4). This aims to fund industrially relevant transnational research technology development and innovation projects in the field of solar electricity technologies. Projects may address:

- innovation processes for inorganic thin-film cells and modules;
- dedicated modules for buildingintegrated photovoltaics design and manufacturing;

- grid integration and large-scale deployment of photovoltaics;
- high efficiency PV modules based on next generation crystalline silicon solar cells;
- solar glass and encapsulation materials;
- concentrator PV technology;
- silicon feedstock, crystallisation and wafering;
- organic solar cells, perovskites and other emerging concepts.

Projects must demonstrate a clear industrial benefit. Not all national and regional programmes will accept applications in all topics.

Partners from Austria, Belgium, Cyprus, Finland, France, Germany, Israel, the Netherlands, Poland, Spain, Switzerland and Turkey may apply.

Consortia must consist of a minimum of two partners from two different countries or regions, and at least one of the partners must be from the industry. Small and medium-sized companies, large companies, academic research groups, universities, public research organisations or other research organisations may participate according to their national or regional financing regulations. The proposals must be recommended by at least two funding organisations from at least two different countries.

The project duration is limited to a maximum of 36 months.

Closing date: 11 Apr 16

Deadline information: Pre-proposals due by 5pm CET, 11 April; full proposals due by 5pm CET, 5 September 2016. All project

partners must contact their funding contact point prior to submitting a pre-proposal.

ELFARE, WELLBEING AND DEMOGRAPHIC CHANGE - UNDERSTANDING
WELFARE MODELS
[PI Demographic

Description:

The Joint Programme Initiative Demographic invites proposals for its welfare, wellbeing and demographic change – understanding welfare models call. This supports research which will improve understanding of how different approaches to welfare secure the quality of life, especially of older people.

Proposals may address one or more of the following topics:

 understanding wellbeing – whether current measures of wellbeing across the changing life-course are appropriate;

\bigotimes

- intergenerational relationships how welfare models can distribute resources, rights and responsibilities in fair and sustainable ways;
- welfare models how welfare models can secure the health and wellbeing of older people confronted with caring needs, subject to frailty and nearing the end of life.

Any institution, as long as they are eligible for funding through national eligibility criteria, may apply. Each proposal must involve between three and seven applicants from at least three different countries that are participating in this call. Not more than two eligible applicants per country are allowed. Participants not eligible to be funded may participate if they are able to secure their own funding.

Projects may last up to three years. Funding and eligible costs may vary according to national funding regulations.

Closing date: 11 Apr 16

Deadline information: Applications are invited between 22 February and 12 noon

CET, 11 April 2016.

ENERAL CALL FOR RESEARCH PROPOSALS

Angelman Syndrome Foundation

Description:

The Angelman Syndrome Foundation invites proposals for reasearch on Angelman syndrome. A total of US\$1 million is available to support preclinical, translational and clinical research areas that investigate all aspects of Angelman syndrome. Priority will be given to pilot projects to test new ideas about the pathogenesis and therapeutics of the syndrome.

One- or two-year grants will be awarded for amounts of up to US\$100,000 per year.

Closing date: 12 Apr 16 (Forecast)
Deadline information: !! Call has not yet
been announced by funder, but this is the

Description:

The Wellcome Trust and the Royal Society invite applications for the Sir Henry Dale fellowships. These enable postdoctoral scientists who wish to build their own UK-based independent research career to address an important biomedical question. Research may range from the molecules and cells vital to life and their role in the global spread of disease, to clinical and public-health research seeking to improve the quality of healthcare. It can be based in the laboratory, clinic or field, and may involve experimental or theoretical approaches.

Applicants are expected to have relevant scientific or mathematical qualifications and be no more than seven years from the date of receiving their PhD. They must be:

- a UK or EEA national:
- a non-EEA national who either has a relevant degree from a UK university,

- or has worked in the UK for at least a continuous three-year period;
- an exceptional biomedical scientist who does not fall within the categories above and whose recruitment to the host organisation would be advantageous to both the applicant and the organisation.

Applicants must also have an eligible sponsoring host organisation in the UK that can guarantee support and adequate space and resources for the duration of the award.

Fellowships are tenable for five years in the first instance, with the potential to apply for competitive renewal for an additional three years. Funding covers a basic salary plus an enhancement of £7,500 per year, research expenses, travel and subsistence, and overseas allowances. In addition, the funders provide an inflation and flexible funding allowance, as

well as a contribution towards indirect and estate costs of £11,000 per year.

Closing date: 12 Apr 16

Deadline information: Preliminary applications due by 5pm, 12 April; invited full applications due by 5pm, 21 June 2016. This call is repeated 3 times a year.

OLLABORATION FUND

Programme for the Endorsement of Forest Certification Schemes

Description:

The Programme for Endorsement of Forest Certification (PEFC) invites applications for its collaboration fund. This aims to support locally relevant advancements in the sustainable management of forests. Proposals will be considered for new and independent projects which:

- stimulate new innovative approaches which contribute to PEFC strategic priorities;
- act as catalysts for locally relevant projects which embody PEFC's vision of a world in which people manage forests sustainably;
- encourage the establishment of new partnerships amongst organisations or strengthen existing partnerships;

• provide co-funding that leverages additional financial sources.

PEFC members and other non-profit organisations are encouraged to submit proposals. Project partners may include private and public sector organisations.

Funding is worth up to CHF40,000 over a maximum of two years. Grantees must provide evidence of at least 35 per cent additional co-funding from other sources within the overall project budget.

Closing date: 12 Apr 16 (Forecast)
Deadline information: !! Call has not yet

2020-ICT-2016 INFORMATION AND COMMUNICATION TECHNOLOGIES

Horizon 2020: Industrial Leadership

Description:

The European Commission Horizon 2020: Industrial Leadership invites proposals, under the leadership in enabling and industrial technologies work programme, for its H2020-ICT-2016 information and communication technologies call. Proposals may address the following topics:

- a new generation of components and systems, including ICT1-2016 smart cyber-physical systems, ICT2-2016 thin, organic and large area electronics and ICT3-2016 smart system integration;
- advanced computing and cloud computing, including ICT6-2016 cloud computing;

- future internet, including ICT10-2016 software technologies, ICT12-2016 net innovation initiative and ICT13-2016 future internet experimentation building a European experimental infrastructure;
- content, including ICT14-2016 big data PPP: cross-sectorial and cross-lingual data integration and experimentation, ICT15-2016 big data PPP: large scale pilot projects in sectors best benefiting from data driven innovation, ICT17-2016 big data PPP: support, industrial skills, benchmarking and evaluation, ICT18-2016 big data PPP: privacy big data technologies, preserving ICT21-2016 support technology transfer to the creative industries,

ICT22-2016 technology for learning and skills and ICT24-2016 gaming and gamification;

- robotics and autonomous systems, including ICT25-2016 advanced robot capabilities research and take-up and ICT26-2016 system abilities, development and pilot installations;
- enabling **ICT** kev technologies, including ICT29-2016 photonics key enabling technologies 2016;
- innovation and entrepreneurship support, including ICT34-2016 precommercial procurement open;
- responsibility and creativity, including ICT35-2016 enabling responsible ICT-related research and innovation and ICT36-2016 boost synergies between artists, creative people and technologists;
- international cooperation activities, including ICT38 Mexico: collaboration on ICT and ICT39 international partnership building in low and middle income countries.

Proposals must take the form of research and innovation actions, coordination and support actions, innovation actions or pre-commercial procurement actions, depending on the topic addressed. Research and innovation actions, pre-commercial procurement actions and innovation actions require participation by at least three legal entities, each established in a different EU member state or associated country. Furthermore, for PCP actions, there must be a minimum of two independent legal entities which are public procurers from two different member states or associated countries. Coordination and support actions require at least one legal entity established in a member state or associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

The indicative budget for this call is €460.5 million. Each successful proposal is expected to receive between €500,000 and €10m, although proposals for other amounts will also be considered.

2020-SC1-PM-2016 PERSONALISED MEDICINE - TOPIC 14 Horizon 2020: Societal Challenges

Description:

The European Commission Horizon 2020: Societal Challenges invites proposals, under the health, demographic change and wellbeing work programme, for its H2020-SC1-PM-2016 personalised medicine call. Proposals may address the following topic:

• SC1-PM-14-2016 EU-Japan cooperation on novel ICT robotics based solutions for active and healthy ageing at home or in care facilities.

Proposals must take the form of research and innovation actions, which require participation by at least three legal entities, each established in a different EU member state or associated country and independent of each other. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia. Any legal entity established in the US is eligible to

receive funding. Proposals under this call must include coordination with a Japanese entity.

Each proposal is expected to receive between €1 million and €2m, although proposals for other amounts may be considered. The indicative budget is €5 million. The project duration is a maximum of 36 months.

IRUS GENOMICS AND EVOLUTION CONFERENCE BURSARIES

Wellcome Trust

Description:

The Wellcome Trust, through the Wellcome Genome Campus, invites applications for bursaries to attend its conference on virus genomics and evolution. The conference, to be held from 8 to 10 June 2016 at the campus, will provide a multidisciplinary forum for scientists interested in the genomics and evolutionary analysis of viruses and will address the fundamental questions of viral origins, transmission and pathogenesis.

Each bursary, funded by Action on Hearing Loss, covers up to 50 per cent of registration costs for a PhD student or junior postdoctoral researcher.

Closing date: 12 Apr 16 Deadline information: Posted date: 14 Dec 15 Award type: Directed grants for individual investigators, Travel to conferences, meetings etc.

Award budget total: -

ESEARCH GRANT Pancreatic Cancer Research Fund

Description:

The Pancreatic Cancer Research Fund invites applications for its research grant. This supports translational research in the field of pancreatic cancer, with a particular focus on early detection and successful treatment.

Applicants must hold a PhD, or equivalent qualification or research experience. Principal applicants must be based in a UK or Ireland research group or institution, however projects that involve collaboration with a researcher or researchers outside these countries are welcomed. PhD studentships may be included within the project description, but the application must be made by the potential supervisor.

The grant is worth up to £180,000 over three years, and covers salary, research costs or both.

Closing date: 13 Apr 16 (Forecast)

Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is

repeated once a year. Posted date: 12 Feb 15

Award type: Directed grants to institutions, research groups etc, Directed grants for individual investigators, Financial aid for postgraduate students

2020-SC1-PM-HCO-2016 PERSONALISED MEDICINE AND HEALTH COORDINATION - TOPICS HCO1, HCO2, HCO4-HCO6, PM1, PM4 TO PM6, PM9, PM11, PM21

Horizon 2020: Societal Challenges

Description:

The European Commission Horizon 2020: Societal Challenges invites proposals under

the health, demographic change wellbeing work programme, for its H2020-

SC1-PM-HCO-2016 personalised medicine and health coordination activities call. Proposals may address the following topics:

- coordination activities, including SC1-HCO-01-2016 valorisation framework programme 7 health and H2020 SC1 research results, SC1-HCO-02-2016 standardisation of preanalytical and analytical procedures for in vitro diagnostics in personalised medicine, SC1-HCO-04-2016 towards globalisation of the joint programming initiative on antimicrobial resistance, SC1-HCO-05-2016 coordinating personalised medicine research and SC1-HCO-06-2016 towards an ERA-NET for building sustainable and resilient health system models;
- understanding health, well-being and disease, including SC1-PM-01-2016 multi-omics for personalised therapies and SC1-PM-04-2016 networking and optimising the use of population and patient cohorts at EU level;
- preventing disease, including SC1-PM-05-2016 the European Human Biomonitoring initiative and SC1-PM-06-2016 vaccine development for malaria and neglected infectious diseases;
- treating and managing diseases, including SC1-PM-09-2016 new therapies for chronic diseases and SC1-PM-11-2016 clinical research on regenerative medicine;
- healthcare provision and integrated care, including SC1-PM-21-2016 implementation research for scalingup of evidence based innovations and good practice in Europe and low- and middle-income countries.

Proposals must take the form of coordination and support actions, research and innovation actions or co-fund European Joint Programme actions. Coordination and support actions require participation by at least one legal entity established in a member state or associated country. Research and innovation actions require participation by at least three legal entities, each established in a different EU member state or associated country. The minimum number of participants in EJPs is five independent legal entities from different member states or associated countries owning or managing national research and innovation programmes. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia. In addition, any legal entity established in the US is eligible to receive funding for specific topics only.

Each proposal is expected to receive between €1 million and €50m, although proposals for other amounts will be considered. The indicative budget is €290m.

Ref: OJ C6776.

Closing date: 13 Apr 16

Deadline information: Proposals due by 5pm

Brussels time.

NTERNATIONAL PROJECT GRANT

Action on Hearing Loss

Description:

Action on Hearing Loss invites applications for its international project grant. This aims to generate scientific discoveries that will lead to new treatments to protect, improve or restore hearing, or to silence tinnitus. Research projects should focus on the following areas:

- improving diagnosis of hearing loss or tinnitus;
- improving medical devices for hearing;
- understanding and prevention of hearing disorders;
- restoration of hearing;
- silencing tinnitus.

Applicants from universities or research institutes in the UK may apply. Co-applicants and collaborators may be from research institutions outside the UK.

The grant is worth up to £55,000 per year and is tenable for up to three years, although the total funding cannot exceed £160,000.

Closing date: 14 Apr 16 (Forecast)

Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. Applications due by 5pm. This call is repeated once a year.

2020-ENG-GLOBALLY-2016-2017 ENGAGING TOGETHER GLOBALLY - TOPICS 8, 9 Horizon 2020: Societal Challenges

Description:

The European Commission Horizon 2020: Societal Challenges invites proposals, under the Europe in a changing world – inclusive, innovative and reflective societies work programme, for its H2020-ENG-GLOBALLY-2016/2017 engaging together globally call. Proposals may address the following topics:

- ENG-GLOBALLY-08-2016-2017 EU-China cooperation on sustainable urbanisation;
- ENG-GLOBALLY-09-2016 centres and networks of European research and innovation.

Proposals must take the form of coordination and support actions. These require at least one legal entity established in a EU member state or associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Proposals must also include at least one legal entity based in China. Topic 9 proposals should target one country or region that is an established or emerging science, technology or innovation leader; proposals addressing all or part of Brazil, China and the US are strongly encouraged without excluding any other countries with similar characteristics. Under this topic, legal entities established in the target country or region are eligible for funding from the Union.

Each proposal may receive between \le 1.5 million and \le 3m, although larger proposals may be considered. The indicative budget for this call is \le 11.5m.

HORT-TERM FELLOWSHIPS Smithsonian Institution

Description:

The Smithsonian Tropical Research Institute invites applications for its short-term fellowships. These enable graduate students to carry out short-term research projects in the topic areas of the STRI research under the supervision of staff scientists. Smaller projects that are part of a larger thesis or dissertation are encouraged and exceptional exploratory projects or pilot studies with well-defined goals and methods may also be considered.

Eligible candidates are graduate students. Occasionally awards are made to undergraduate students.

Fellowships provide a stipend to cover living expenses, worth US\$800 per month, a research allowance worth up to US\$2,000 and round-trip coach airfare. Projects have a maximum duration of three months.

Closing date: 15 Apr 16

TELLOWSHIPS FOR NON-DUTCH SCHOLARS

Netherlands Institute for Advanced Study in the Humanities and Social Sciences

Description:

The Netherlands Institute for Advanced Study in the Humanities and Social Sciences (NIAS) invites applications for its fellowships for non-Dutch scholars. These enable prominent researchers and senior scholars in the humanities and social sciences to undertake research at the institute.

Applicants should have at least three years of postdoctoral academic experience and they should already have made a contribution to their field. The applicants' achievements and the added value of the proposed project for the Dutch scientific community are given special consideration in the evaluation process. Applications by former NIAS fellows and scholars at the end of their career are given low priority.

Fellows receive an office at the institute and a studio or family apartment at a subsidised rate. Travel costs for relocating to the NIAS may be reimbursed, and a stipend may be available if the fellow's home institution cannot cover the fellow's salary for the duration of the stay at NIAS.

Stipends range from €2,600 to €3,800 per month over a period of up to one academic year.

Closing date: 15 Apr 16

AGE ERLANDER FOUNDATION FOR INTERNATIONAL COOPERATION

Socialdemokraterna – Social Democratic Party in Sweden

Description:

The Social Democratic Party in Sweden invites applications for its international cooperation grants, under the Tage Erlander Foundation. These enable international scholars to study Swedish social state of affairs in Sweden, and Swedish scholars to study social state of affairs in a developing country. Studies should preferably be conducted in the areas of solidarity, equality, peace and freedom.

Applications from young scholars are especially encouraged. Preference is given to applicants from a developing country. Swedish applicants must conduct their studies in a developing country.

OHN F PERKINS JR MEMORIAL AWARD FOR INTERNATIONAL PHYSIOLOGISTS

American Physiological Society

Description:

The American Physiological Society invites applications for the John F Perkins Jr memorial award for international physiologists. The award promotes cultural exchange and scientific collaborations by providing supplementary aid to families of foreign scientists working for a minimum of three months in the US. In this way, young scientists are able to bring their families and thus make full use of the cultural exchange as well as the scientific benefits associated with an international collaboration. The award will support family visits to the US for postdoctoral fellows and junior faculty from overseas.

The programme presupposes that the visiting scientist and their host already have made arrangements for scientific collaboration and have sufficient funds to cover the needs of the visiting scientist. The application must be made jointly by the host and the visiting scientist. The host must be an APS member.

The recipient receives funds generally not exceeding US\$5,000.

Closing date: 15 Apr 16

Deadline information: Deadlines on: 15 April 2016, 15 October 2016, and repeated

annually.

REMATURITY RESEARCH INITIATIVE GRANTS March of Dimes Foundation

Description:

The March of Dimes Birth Defects Foundation invites proposals for its prematurity research initiative grants. These support projects related to the aetiology of normal labour and preterm labour with the intent to provide new insights into preventing preterm births. Emphasis is upon proposals using technology of or encompassing contemporary technologies of genetic, molecular biology and gene-environmental interactions.

Proposals are especially encouraged from established investigators heretofore not involved in prematurity prevention research and wishing to enter the prematurity domain.

Grants do not ordinarily cover the principal investigator's or other faculty salary, but they do provide salary support for technical help. Funding is generally worth approximately US\$145,000 per year over a period of up to three years.

Closing date: 15 Apr 16 (Forecast)

RANSLATION FUND Wellcome Trust

Description:

The Wellcome Trust invites concept notes for its translation fund. Awards support the development of innovative and ground breaking technologies that address an unmet healthcare need in the biomedical area. Projects must have demonstrated proof-of-principle supported by experimental data, and must plan to take the product, technology or intervention to a stage at which it is sufficiently developed to be attractive to

another party. Projects may cover any aspect of technology development from a range of disciplines, including physical, computational and life sciences.

Proposals are welcome from academic and commercial organisations based in the UK and overseas, including non-profit research institutions and those funded by the Medical Research Council, Cancer Research UK and

the Biotechnology and Biological Sciences Research Council. Single institutions or consortia thereof may apply. Commercial companies may apply either as principal applicants or as collaborators.

Awards may cover staff salaries, equipment, materials, travel and other direct costs of the project, including equipment purchase and maintenance costs.

Closing date: 15 Apr 16

Deadline information: Concept notes due by 5pm GMT, 15 April; invited preliminary applications due by 5pm GMT, 13 June 2016.

This call is repeated 2 times a year.

ACULTY RESEARCH AWARDS Google

Description:

Google invites applications for its faculty research awards programme. This supports cutting-edge academic research in computer science, engineering and related fields.

Proposals must address one of the following research interests:

- computational neuroscience;
- economics and market algorithms;
- geography and maps;
- human-computer interaction;
- information retrieval, extraction and organisation;
- machine learning and data mining;
- machine perception;
- machine translation;
- mobile;
- natural language processing;
- networking;
- online education at scale;
- physical interactions with devices;
- policy and standards;
- privacy;
- robotics;
- security;
- social networks;
- software engineering and programming languages;
- speech;
- structured data and database management;
- software and hardware systems.

Full-time faculty members from universities worldwide may apply. Awards are worth a maximum US\$150,000 but the median award amount is around US\$50,000 to US\$60,000. Most awards are funded at the amount needed to support basic expenses for a graduate student for one year. Each funded project will be assigned a Google sponsor.

NTERNATIONAL FUND FOR CULTURAL DIVERSITY

UNESCO

Description:

UNESCO invites applications for its international fund for cultural diversity. This aims to promote sustainable development and poverty reduction in developing countries by supporting projects that foster the emergence of a dynamic cultural sector. Activities should facilitate the introduction or elaboration of policies and strategies that protect and promote the diversity of cultural expressions as well as the reinforcement of institutional infrastructures supporting viable cultural industries.

Applications are open to state parties, public institutions and non-governmental organisations from developing countries; international NGOs from other countries are also eligible to apply provided that projects are carried out within developing countries.

Grants are worth a maximum of US\$100,000.

Closing date: 15 Apr 16 (Forecast)

Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. Applications due by 12 midnight CET. This call is repeated once a year.

Description:

The International Visegrad Fund invites applications for its strategic grants. These support long-term projects of strategic character that link institutions of all four Visegrad group countries.

Any legal entity or natural person worldwide can apply. However, priority is given to public and non-profit institutions.

All four V4 countries must be represented.

Funding will cover a maximum of 70 per cent of project costs. The maximum budget is unlimited, although the average budget is approximately €40,000. Up to 15 per cent of the granted sum may be allocated for overhead costs, and up to seven per cent for tangible and intangible assets. Projects may last up to 36 months.

Closing date: 15 Apr 16

Deadline information: All proposals must be submitted both online, with the online application system approximately one month before the deadline, and delivered in hardcopy form with accompanying enclosures. This call is repeated once a year.

OMPARATIVE RESEARCH NETWORKS

Council for the Development of Social Science Research in Africa

Description:

The Council for the Development of Social Science Research in Africa invites proposals for the formation of comparative research networks. This programme aims to encourage intra-African comparative work that explores and exploits the variegated nature of realities

on the African continent with a particular emphasis on the global south.

Priority research themes include:

- the dynamics and structures of aesthetics and aspirations in an evolving Africa;
- the environment, natural resource management and climate change;
- public health in Africa;
- gender and security regimes in Africa;
- the meaning, nature, implications and possibilities of Africa's youth bulge;
- the formulation, adoption, signature, ratification, domestication and implementation of regional policies in Africa;
- the gendered economics of domestic labour regimes in Africa.

Researchers based in African universities and centres of research are eligible to form comparative research networks. These should have between three and five members, be multidisciplinary in composition, be sensitive to gender issues and accommodative of younger scholars.

Grants vary from group to group and generally range between US\$20,000 and US\$35,000.

Code for Africa

Description:

The Code for Africa invites applications for its impactAFRICA programme. This supports data journalism that tackles development issues, such as public healthcare, in Ghana, Kenya, Nigeria, South Africa, Tanzania and Zambia. Proposals should focus on in-depth reportage into hidden, neglected or underreported health and development issues. The resulting projects should offer compelling storytelling, told in an original way that uses digital techniques for improved audience engagement, and that also uses data to personalise or localise stories for maximum impact.

Teams of journalists or news innovators from all across the world may apply. All projects should include members from their target country of Ghana, Kenya, Nigeria, South Africa, Tanzania or Zambia. Academic research projects must demonstrate a media partnership to publish the research in journalistic format that adheres to the innovative storytelling guidelines and is innovative and designed to reach a large audience in one of the eligible countries.

The total budget is US\$500,000. The 10 finalists will receive production grants to

enable them to produce their stories along with technology supports, journalistic mentoring and support on issues ranging from audience strategies to syndication of the content. The size of the grants will be determined by budgets workshopped by the applicant and impactAFRICA. Three additional cash prizes are awarded to the best investigative report, the best data-driven story, and the best service journalism project.

ESEARCH CAREER ENHANCEMENT AWARDS

American Physiological Society

Description:

The American Physiological Society invites applications for its research career enhancement awards. These awards are designed to enhance the career potential of APS regular members.

The award can be used to support short-term visits to other laboratories to acquire new specific skills and to support attendance at special courses devoted primarily to methodologies appropriate for both a new investigator and a more senior investigator entering a new field of research.

Awards are worth up to US\$4,000.

OMING SOON: AUSTRALIA-ASEAN COUNCIL GRANTS

Department of Foreign Affairs and Trade

Description:

The Department of Foreign Affairs and Trade will shortly be inviting applications for its Australia-Association of South East Asian Nations council grants. They are scheduled to open 29 February and close 15 April 2016. The following information is from the previous round and is subject to change.

These grants provide seed funding for innovative proposals relevant to promote the cooperation between Australia and South-East Asian countries of Brunei Darussalam, Cambodia, Indonesia, Lao PDR, Malaysia, Burma, Philippines, Singapore, Thailand and Vietnam. The council priorities funding for activities which:

- increase people-to-people linkages between Australia and South-East Asian countries, particularly between people and institutions that have the capacity to influence others;
- increase knowledge and understanding in Australia of South-East Asian countries, and the opportunities they present;
- enhance awareness and understanding in Australia and South-East Asia of each other's cultures, values and traditions.

Priority areas include trade, women in leadership, innovation and technology, media, education, arts and culture.

Australia citizens or permanent residents, as well as Australian entities with an Australian business number or Australian company number, may apply. Joint applications may be accepted from non-Australian citizen or permanent resident individuals or organisations who are working in partnership with Australian individuals, groups or organisations,

Grants will normally be worth between AU\$10,000 and AU\$40,000 per application per year. Around eight to 10 projects will be funded. Multiyear funding may also be available for up to three years.

Closing date: 18 Apr 16 Deadline information: Applications are invited between 1 February and 3pm, 18 April 2016.

OMING SOON: TRANSNATIONAL COLLABORATIVE RESEARCH PROJECTS Water JPI

Description:

The WaterWorks ERA-NET cofund, in collaboration with the Water IPI and the FACCE JPI, will shortly be inviting applications for its transnational collaborative research projects. The call is expected to open on 16 February 2016, with an expected closing date on 19 April 2016. The following information may be subject to change.

This call aims to support transnational research on sustainable management of water resources in agriculture, forestry and freshwater aquaculture sectors. Proposals must focus on at least one of the following topics:

- increasing the efficiency and resilience of water uses;
- monitoring and reducing soil and water pollution;
- integrating social and economic dimensions into the sustainable management and governance of water resources.

Universities, other higher education institutions, public research institutions,

private non-profit organisations, and private companies may apply in consortia. Each consortium must include a minimum of three partners from three different participating countries. Researchers from third countries can participate at their own expense.

Projects may last between 24 and 26 months. The indicative total budget for this call is €26 million.

Closing date: 19 Apr 16 (Forecast)

Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. Preproposals are invited between 16 February and 5pm CET, 19 April; full proposals due by 5pm CET, 15 September 2016.

OMEN PEACEMAKERS PROGRAMME University of San Diego

Description:

The Joan B Kroc Institute for Peace and Justice at the University of San Diego invites applications for its women peacemakers programme. This enables women peacemakers to spend 10 weeks at the university, in order to document their stories and best practices relating to human rights and peacemaking efforts in their home countries. Applicants are paired with a peace writer and a documentary film team to document their stories.

Applicants must be women who:

- have made significant contributions to peacemaking or defending human rights in their communities;
- have been active in the field for at least 10 years;
- are active at the grassroots, local, national or international level, and have concentrated their efforts on their own country;
- have typically led or created organisations, networks or movements for peace or human rights;
- are willing to share their work, insights and challenges.

Funding covers local transportation costs, return airfare to San Diego, housing, living expenses and incidental costs for the 10-week period.

LBERT E WOOD AWARD

Society of Vertebrate Paleontology

Description:

The Society of Vertebrate Paleontology invites applications for the Albert E Wood award. This supports student research that involves museum and university vertebrate fossil or natural history collections. Proposals must be for collection-based work on some aspect of vertebrate evolution, with special attention given to those that greatly enhance the value of fossil material already residing in collections.

Both the applicant and the sponsor must be current SVP members.

The award is worth up to US\$1,200.

OSTPONED: MOBILEX MOBILITY GRANTS

Styrelsen for Forskning og Innovation – Danish Agency for Science, Technology and Innovation

Description:

The Danish Council for Independent Research's Medical Sciences division's (FSS) Mobilex mobility grants will not be offered in Spring 2016 on account of lack of funding. The following information is from the previous round and is subject to change.

These aim to facilitate more career paths in Danish research, increase mobility within Danish research environments and enable early-career researchers to carry out research projects at research institutions in Denmark and abroad.

Applicants must have obtained a PhD or equivalent qualifications. A researcher already employed at a Danish institution may apply for a project to be carried out abroad, and a researcher employed abroad may apply

for a project to be carried out at a Danish research institution.

Grants are open to all nationalities but the applicant may not, within the last three years, have stayed more than 12 months in the country where the project will be carried out.

Grants have a duration of 24 months. The funds may be used for salaries, operating-, travel- and living costs and equipment. Overhead for the employing institution is also included, if the institution is located in Denmark.

Up to 16 grants are available across all five council divisions.

Closing date: 23 Apr 16 (Forecast) Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

AREER DEVELOPMENT AWARD

Medical Research Council

Description:

The Medical Research Council invites applications for its career development award. This supports postdoctoral researchers who are not clinically active to consolidate their research skills and make the transition from postdoctoral researcher to independent investigator. Proposals are encouraged across all areas of the research council's remit. Applications may range from basic studies with relevance to mechanisms of disease, to translational and clinical research.

Applicants should have a PhD or equivalent. Applicants who hold a tenured academic position are not eligible.

The fellowship provides a salary, support for research staff, consumables expenses, travel costs and capital equipment appropriate for the research project under full economic costs. MRC encourages applicants to consider the funding for research outside the UK, at a second UK institution or within industry in order to establish collaborative networks or cross-sector development.

The maximum duration of an award is five years.

Closing date: 27 Apr 16 Deadline information: Applications are accepted between 16 March and 4pm, 27 April 2016; and between 12 August and 4pm, 22 September 2016. Deadlines on: 24 September 2015, 27 April 2016, 22 September 2016.

ACULTY GRANT PROGRAMME Marfan Foundation

Description:

The Marfan Foundation, in collaboration with the Canadian Marfan Association, invites applications for its faculty grant programme. This supports research into Marfan syndrome and related disorders.

Special areas of interest include: Basic research, translational studies and clinical cardiovascular, orthopedic, pulmonary, ophthalmologic, pain and other pertinent areas utilising synergistic collaborations; integration of novel theories non-traditional researchers established paradigms; novel animal model systems; innovation; and the distillation of knowledge into practical new therapies. Special consideration is given to proposals in non-cardiac disciplines and clinical research areas.

A principal investigator must hold an MD, DO, PhD, ScD, DDS, DVM or equivalent degree. The investigator must have proven ability to pursue independent research as evidenced by original research publications in peer-reviewed journals and should hold a position of associate professor or above. Faculty members with less experience who have obtained an NIH R-01 grant are also eligible. Work can be performed in the US or internationally and non-US appointments are acceptable.

The MF and the CMA will co-fund one two-year grant for US\$100,000, and the MF will award an additional one or two two-year grants worth US\$100,000 each.

2020-INNOSUP-2016 FOR A BETTER INNOVATION SUPPORT TO SMES – TOPIC 4

Horizon 2020: Industrial Leadership

Description:

The European Commission Horizon 2020: Industrial Leadership, under the Innovation in SMEs work programme, invites proposals for its H2020-INNOSUP-2016 for a better innovation support to SMEs call. Proposals must address the topic INNOSUP-04-2016 SMEs for social innovation – challenge platform. The action aims at incentivising more SMEs to seize innovation opportunities arising from social needs or societal challenges, and thereby develop further solutions to those, in partnerships with social enterprises.

Proposals must take the form of coordination and support actions. These require participation by at least one legal entity established in a member state or associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Each successful proposal is expected to receive around $\in 3.5$ million although proposals for other amounts will also be considered. The total indicative budget for this call is $\in 3.5$ m.

Ref: OJ C6776.

Closing date: 28 Apr 16

Deadline information: Proposals invited between 10 November 2015 and 5pm

Brussels time, 28 April 2016.

NHANCING REGULATORY SCIENCE FOR THE RISK-BASED ASSESSMENT OF EMERGING MANUFACTURING TECHNOLOGIES (U01) Food and Drug Administration

Description:

The US Food and Drug Administration invites applications for its enhancing regulatory science for the risk-based assessment of emerging manufacturing technologies (U01) funding opportunity announcement. This supports the advancement of regulatory science to facilitate the implementation and assessment of emerging manufacturing technology in the pharmaceutical sector.

US and foreign for-profit and non-profit organisations and public and private organisations are eligible to apply. Each application may feature multiple principal investigators and programme directors.

The total budget is US\$2 million, to fund up to two grants. It is anticipated that this budget

will remain the same for each year of the award. Funding for each award is worth up to US\$1m per year, over a maximum of three years.

Ref: PAR-15-187.

Closing date: 29 Apr 16

Deadline information: Applications due by 11.59pm Eastern Time, 30 June 2015 and by 8pm Eastern Time, 29 April 2016, 28 April 2017, 30 April 2018 and 30 April 2019.

Description:

The March of Dimes Birth Defects Foundation invites letters of intent for its research programme grants. These support research projects directed at the prevention of birth defects, encompassing basic biological processes governing differentiation and development, genetics and genomics of these processes, clinical studies, reproductive health and environmental toxicology, and social and behavioural studies concerning cognitive and behavioural risks that affect outcomes of pregnancy, the perinatal period, and subsequent child development. The focus of the proposal should be on one of the following areas:

- cell lineage and differentiation, developmental biology;
- gene discovery, biological mechanisms, translational medicine;
- social and behavioural sciences involving family units, including genes, toxicants, social determinants that adversely affect language or behaviour, especially if involving

premature infants or children with birth defects.

Applications are welcomed from all qualified scientists with faculty appointments or equivalent at universities, hospitals and not-for-profit and for-profit research institutions.

Grants do not ordinarily cover the principal investigator's or other faculty salary, but they do provide salary support for technical help. Funding is generally worth approximately US\$100,000 per year over a period of up to three years.

LTERNATIVES RESEARCH GRANTS

Alternatives Research and Development Foundation

Description:

The Alternatives Research and Development Foundation invites applications for its alternatives research grants. These aim to promote the development, validation and adoption of non-animal methods in biomedical research, product testing and education. Studies should have the potential to replace or reduce laboratory animals.

Grants are open to individuals affiliated with a non-profit, tax-exempt institution, organisation or foreign equivalent. However, preference will be given to individuals associated with US institutions or organisations. Grants are each worth up to US\$40,000.

Closing date: 30 Apr 16 (Forecast)

C WHITE DENTAL AWARDS

Royal College of Physicians and Surgeons of Glasgow

Description:

The Royal College of Physicians and Surgeons of Glasgow invites applications for the TC White dental awards. These support research related to dentistry. The following awards are available:

- the TC White young researcher grant, worth up to £10,000, enables individuals at an early stage of their careers to develop general research skills in a wide range of dental research;
- three TC White travel grants, worth up to £2,000 each, enable individuals to gain clinical or research experience, and to attend or present at symposia;
- two TC White observership awards, worth £2,000 each, enable non-UK residents to gain experience at a centre of excellence within the UK or overseas for a period of two weeks;
- one TC White lecture award, worth up to £1,000, enables those at an early stage of their career, who have less than 12 years experience, to present

their research in all areas of dentistry to a larger audience.

Applicants must be fellows or members of the dental faculty of the college. They must either be dental care professionals with associate membership or dentists who have passed part one MFDS or equivalent. Those who have passed part one MFDS or equivalent must have registered to sit part two MFDS RCPS (Glasg).

Closing date: 30 Apr 16

NNUAL DIVERSITY RESEARCH GRANT PROGRAMME

American Library Association

Description:

The American Library Association invites applications for its annual diversity research grants. The grants aim to address critical gaps in the knowledge of diversity issues within library and information science.

Applicants must be ALA members. Three grants are available, each comprising a one-time award of US\$2,500.

Closing date: 30 Apr 16 (Forecast)

Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. Applications due between 31 January and 30 April 2014. This call is repeated once a year.

Posted date: 28 Nov 13

Award type: Directed grants for individual

investigators

Award amount max: \$2,500 Award budget total: \$7,500

OYAL COLLEGE OF PHYSICIANS ESSAY PRIZE

Institute of Physics and Engineering in Medicine

Description:

The Institute of Physics and Engineering in Medicine and the Royal College of Physicians invite applications for their essay prize. This recognises novel work in the form of a jointly written essay which has exploited or developed any aspects of the physics and engineering in medicine and biology. The essay should aim at increasing public awareness of the contribution of physics and engineering in healthcare. It may be either a published article or written with a view to publication.

Applicants must either be members of the society or institute.

The prize is worth £1,000, and winners are invited to IPEM's conference dinner to receive the award.

Closing date: 30 Apr 16

Deadline information: Applications are invited between 1 January and 30 April annually. This call is repeated once a year.

ONTRIBUTION OF MULTISENSORY COMPONENTS TO STRUCTURED-LANGUAGE READING INSTRUCTION International Dyslexia Association

Description:

The International Dyslexia Association invites applications for its multisensory instruction grants. The purpose is to stimulate scientific study of the value of multisensory instruction in teaching reading, particularly for students at risk of academic failure or underachievement, such as those with dyslexia. The association provides funding for

new educational, neuroscience, cognitive science, or other research projects with this focus.

Faculty or affiliates, such as graduate students or clinicians, at universities, educational, medical and other non-profit research institutions are eligible. The program is open to all nationalities. The grant is worth up to US\$20,000 for a period of one year.

Closing date: 30 Apr 16 (Forecast)

Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is

NNELIESE MAIER RESEARCH AWARDS

Alexander von Humboldt Stiftung – Alexander von Humboldt Foundation

Description:

The Alexander von Humboldt Foundation invites nominations for the Anneliese Maier research awards. These enable humanities and social sciences researchers from abroad to collaborate with specialist colleagues in Germany in order to further the internationalisation of research in these topics in Germany.

Nominations for the award must come from an established scholar at a university or research institution in Germany. Candidates must not already hold or have accepted an offer of permanent employment in Germany. German nationals are only eligible if they have worked abroad for the last five years or more. Previous winners of awards from the Humboldt Foundation are not eligible. The nomination of female researchers is especially encouraged.

The award amount is €250,000 over five years. Any expense that serves the research collaboration of the award winner with specialist colleagues in Germany is eligible. A substantial part should be used for involving students, doctoral candidates and junior researchers. Up to eight awards are available.

Closing date: 30 Apr 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the

approximate deadline we expect. This call is repeated once a year.

Description:

The Food and Drug Administration invites proposals for its enhancing post-market surveillance through developing registries for medical device epidemiology call. This U01 opportunity aims to address funding identified gaps in the current postmarket surveillance system by developing new methodologies for registry data collection and linkage, or by adapting known methodologies to medical devices. The purpose of this study is also to develop novel methodology that allows for use of the registry data collection infrastructure to serve multiple purposes including postmarket surveillance, device tracking through unique device identifiers, prospective embedded studies and quality improvement. Another purpose is to develop registries and consortia in key medical device areas to implement new registry methodologies that strategically broaden the scope of the US and international postmarket surveillance system.

Eligible applicants include domestic and foreign for-profit or non-profit organisations and public or private institutions.

Application budgets should not exceed US\$150,000 per year. Funding will be provided for one year, with the possibility of

up to four years of additional support. PAR-13-202.

Closing date: 30 Apr 16

Deadline information: Applications due by 11.59pm ET. Deadlines on: 14 June 2013, 30 April 2014, 30 April 2015, 30 April 2016, 30

Food and Drug Administration

Description:

The US Food and Drug Administration invites proposals for its grants for advancing medical device postmarket surveillance infrastructure and epidemiologic methodologies through multi-stakeholder partnership (U01). The purpose of this U01 funding opportunity announcement is to continue to facilitate development of the National Medical Device Postmarket Surveillance System, epidemiologic methodologies and scientific systems to facilitate a comprehensive understanding of medical device performance and clinical outcomes associated with medical device use. The specific aims are to:

 support implementation of the national medical device post-market surveillance system through

- sustainable multi-stakeholder partnership;
- develop new epidemiologic methodologies or to apply existing methodologies in new ways to provide a comprehensive understanding of medical device performance and clinical outcomes associated with device use in realworld use settings;
- develop new systems of data collection or analysis to permit prospective active medical device post-market risk identification, periodic systematic updates of comprehensive evidence syntheses, visual analytics and other efforts to broadly apply complex methodology

to diverse data sources that facilitates post-market surveillance;

- develop methodological approaches or systems that facilitate the use of post-market information for regulatory decision-making throughout the entire device lifecycle;
- support the development of and access to high-quality data sources that can be used in comprehensive post-market evaluation of medical device performance and associated outcomes.

Eligible applicants include domestic and foreign for-profit or non-profit organisations and public or private institutions.

Application budgets should not exceed US\$1.1 million per year, over a project period of one to five years. RFA-FD-13-232.

BEL VISITING SCHOLAR PROGRAMME

International Mathematical Union

Description:

The International Mathematical Union and the Niels Henrik Abel Board invite applications for the Abel visiting scholar programme. This enables mathematicians professionally based in developing countries to visit an international research collaborator for a period of one month.

Applicants must hold a PhD in mathematics, be based in a developing country at the time of application, hold a position in a university or research institution and be in the early stages of their professional careers. Applicants should not yet be of full professorial rank but have a working contract in a university or college, and they must be under 40 years of

age on the application deadline. The maximum age may be increased by up to three years in the case of an individual with a broken career pattern. Applications from mathematicians women are strongly encouraged. The applicant must already have initiated contact with the proposed partner. international research The collaboration should take place at the international partner's home institution.

The grant is worth up to US\$5,000, and will cover health insurance, visa cost, all travel and living expenses, including accommodation for one month.

Closing date: 30 Apr 16

Deadline information: Applications must be received at least four months before the desired starting date. Deadlines on: 30 April 2016, 31 August 2016, 8 January 2017.

OMMITTEE FOR AID AND EDUCATION IN NEUROCHEMISTRY FUNDING International Society for Neurochemistry

Description:

The International Society for Neurochemistry's Committee for Aid and Neurochemistry Education in applicants for its funding schemes. These aim to stimulate neurochemical research in economically deprived and developing countries. Funding supports scientists in the early stages of their careers who reside in countries with limited financial support for research in neurochemistry. The initiative includes six diverse support schemes;

- visit by the applicant to another laboratory;
- research supplies for use in the applicant's home laboratory;
- ISN CAEN Return home grant;
- ISN CAEN career interruption, reentry, grant;

- travel awards for individuals to scientific meetings of ISN sister societies;
- support for participation by individuals in scientific workshops, training courses or satellite meetings in developed or developing countries;
- support for the implementation of scientific or educational workshops and small schools in a developing country.

Applicants must be postdoctoral young investigators within eight years of completing their PhD or PhD students at the mid to final stages of their studies. They must be active members or applying to be members of the ISN. Awards are worth up to US\$10,000, depending on the scheme.

Closing date: 30 Apr 16

Description:

The Fisheries Society of the British Isles invites applications for the Wyn Wheeler research grant. This provides financial support for members to continue their activities in fish biology following retirement from full-time employment.

Applicants may be based anywhere in the world, but must have been paid-up members of the society for a minimum of 28 days at the closing date for applications.

The award budget is £6,000.

Closing date: 01 May 16

Deadline information: Deadlines on: 1 May 2016, 1 September 2016, 1 January 2017, and

repeated annually. Posted date: 12 Mar 14

Award type: Directed grants for individual

investigators

AEDIATRIC DERMATOLOGY RESEARCH GRANTS Society for Pediatric Dermatology

Description:

The Society for Pediatric Dermatology invites proposals for its paediatric dermatology research grants. These support scholarly clinical or basic research and study initiations in the field of paediatric dermatology. Two types of awards are available:

- one William Weston research award, worth up to US\$20,000, for scholarly clinical or basic research with preference given to young investigators and members of the society;
- three pilot project awards of to US\$7,500 for studies important to paediatric dermatology, with preference given to clinical studies and projects by members of the society, while collaborative clinical studies are encouraged.

Closing date: 01 May 16 (Forecast)

Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

R ERIC GUILER TASMANIAN DEVIL RESEARCH GRANTS *University of Tasmania*

Description:

The University of Tasmania, in partnership with the Tasmanian Government, Australian Commonwealth Government and Australian zoos and wildlife parks, invites applications for the Dr Eric Guiler Tasmanian devil research grants. These support research projects that focus on research to better understand the devil facial tumour disease and its impacts on wild devil population, the investigation of strategies to augment the wild devil populations, and the development of potential treatments for, and responses to, the disease. Priority is given to projects that:

- optimise the insurance population;
- develop a vaccine or treatment to devil facial tumour disease;
- improve genetic outcomes.

Applications are invited from national and international individuals or organisations. Collaborative research projects that involve UTAS are given priority.

Grants are worth up to AU\$35,000 each.

Closing date: 01 May 16 (Forecast) Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated 2 times a year. Posted date: 29 Sep 15

ESEARCH GRANTS International Retinal Research Foundation

Description:

The International Retinal Research Foundation invites applications for its research grants. These support scientific research on the diseases of the human eye, especially its centre, the macula, and peripheral retinal research that ultimately will accelerate the outcome of discovery. Specific consideration will be given to scientists actively working toward discovering the causes, prevention, and cures of macular degeneration and diabetic retinopathy.

Grants will only be awarded to non-profit organisations. Principal investigators must have faculty appointments. Postdoctoral researchers may serve as co-investigators, and postdoctoral fellowship funding may be approved for individuals with a terminal degree who have opted to pursue training in vision research.

Funding is worth up to US\$100,000 over a maximum of two years.

Closing date: 01 May 16 (Forecast)

Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. Optional postdoctoral scholar nominations due by 1 March; submissions due by 1 May annually. This call is repeated once a year.

ESEARCH GRANTS National Rosacea Society

Description:

The National Rosacea Society invites applications for its research grants

programme. This programme offers research grants of US\$10,000 to US\$25,000 to

encourage and support scientific investigation into the potential causes and other key aspects of rosacea that may lead to improvements in its treatment and potential prevention or cure. High priority is given to research in such areas as pathogenesis, progression, mechanism of action, cell biology and potential genetic factors of this conspicuous and often life-disruptive condition. Studies may also be funded in such areas as epidemiology, predisposition, quality of life and associations with environmental and lifestyle factors.

The program is supported by donations from individuals, and funds are available to researchers worldwide.

Closing date: 01 May 16 (Forecast) Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

LINICAL RESEARCH PROGRAMME

International Society of Nephrology

Description:

The International Society of Nephrology invites applications for its clinical research programme. This supports research and intervention studies related to chronic kidney disease and its risk factors.

The following activities may receive support:

- screening and intervention studies identifying the individuals at high risk for chronic kidney disease screening programmes;
- clinical research studies addressing specific local needs - small clinical research projects aimed at addressing specific needs at regional or country level.

Each project leader must be a member of ISN based at a nationally recognised institution, and the project must be conducted in a lowor middle-income country, with preference given to projects in least-developed countries. The top three projects in each round will receive between US\$10,000 and US\$20,000.

Closing date: 01 May 16

Deadline information: Application form opens in January, with proposals due by 10pm CET, 1 May and 1 October annually.

MERGING INTERNATIONAL, MULTIDISCIPLINARY RESEARCH TEAM GRANTS International Continence Society

Description:

The International Continence Society (ICS) invites applications for its emerging international, multidisciplinary research team grants. These facilitate the development of

international collaborations between multidisciplinary research partnerships of at least two society members representing different disciplines, institutions and countries.

Proposals must be multidisciplinary, involving more than one speciality, healthcare profession or scientific discipline, and involve a partnership between more than one institution from at least two different countries. In addition, they must be consistent with the directives and priorities of the society. Collaborators may apply together as co-principal investigators, or as a team with one principal investigator and one or more co-investigators.

Grants are worth up to £10,000 each and may be used to cover travel expenses for team meetings, meeting fees, preparation of grant applications and other related expenses. Projects must be completed within two years of receipt of funds.

Closing date: 01 May 16

Deadline information: This call is repeated

once a year.

LOBAL NURSING RESEARCH GRANT
Sigma Theta Tau International

Description:

The Sigma Theta Tau International Honor Society of Nursing invites applications for its global nursing research grant. This supports a registered nurse in conducting a research project that focuses on responding to health disparities globally.

Principal investigators must be registered nurses with a current licence and at least a master's degree in nursing. Applications are open to individuals throughout the world. All other qualifications being equal, preference will be given to Sigma Theta Tau members.

The project, which may receive up to US\$12,000 of funding, must be completed within 18 months. The award recipient must attend the STTI convention to accept the award.

Closing date: 01 May 16 (Forecast)

Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

ROJECT GRANTS Van Feden Foundation -

Van Eeden Foundation – Stichting het Van Eeden-fonds

Description:

The Van Eeden Foundation invites applications for its project grants. These support research and conservation projects on a botanical, ecological or ethnobotanical topic, relevant to one of the target areas: Guyana, Suriname, French Guiana, Aruba, Bonaire, Curaçao, Saba, St Eustatius, and St Maarten.

Applications are open to students and researchers worldwide. The research must be conducted under the supervision of a scientific institute in one of the target areas, or at an university or research institute elsewhere.

Grants are generally worth up to €1,250, though larger projects may also receive support. Funding can be used towards fieldwork, internships, visits to herbaria or conferences, publications, laboratory analyses, travel or other research expenses. Salaries and overhead costs will not be covered.

Closing date: 01 May 16

NTER-ARTS OFFICE - GRANTS TO ARTISTS

Canada Council for the Arts - Conseil des Arts du Canada

Description:

The Canada Council for the Arts invites applications, via its Inter-Arts Office, for its grants to artists. These enable professional Canadian artists and independent critics or curators active in integrated arts to research, create, produce or engage in professional development, including market access activities, in Canada or abroad. Candidates

may apply for one, two or all three of the following programme components: research and creation, production and professional development.

Applications are open to Canadian citizens or persons with permanent resident status. Applicants do not need to be living in Canada when applying.

Grants are worth up to CA\$25,000 each for artists and CA\$30,000 for collaborations.

Closing date: 02 May 16

Deadline information: Applications due by 1 May annually, however, if this date falls on a weekend or statutory holiday, the deadline moves to the next business day. This call is repeated once a year.

2020-JTI-FCH-2016-1 FCH2 JU CALL Horizon 2020: Societal Challenges

Description:

The European Commission Horizon 2020: Societal Challenges and the Fuel Cells and Hydrogen Joint Undertaking invites proposals for their H2020-JTI-FCH-2016-1 FCH2 JU call. Proposals may address the following topics:

- FCH-01-1-2016 manufacturing technologies for proton exchange membrane fuel cells stack components and stacks;
- FCH-01-2-2016 standardisation of components for cost-efficient fuel cell systems for automotive applications;

- FCH-01-3-2016 PEMFC system manufacturing technologies and quality assurance;
- FCH-01-4-2016 development of industrialisation-ready PEMFC systems and system components;
- FCH-01-5-2016 develop new complementary technologies for achieving competitive solutions for marine applications;
- FCH-01-6-2016 develop new complementary technologies for achieving competitive solutions for rail applications;

- FCH-01-7-2016 improvement of compressed storage systems and related manufacturing processes in the perspective of automotive mass production;
- FCH-01-8-2016 development of innovative hydrogen compressor technology for small scale decentralised applications for hydrogen refuelling or storage;
- FCH-01-9-2016 large scale validation of fuel cell bus fleets;
- FCH-01-10-2016 validation of fuel cell urban trucks and related infrastructure;
- FCH-02-1-2016 establish testing protocols for electrolysers performing electricity grid services;
- FCH-02-2-2016 development of compact reformers for distributed biohydrogen production;
- FCH-02-3-2016 development of processes for direct production of hydrogen from sunlight;
- FCH-02-4-2016 co-generation of hydrogen and electricity with hightemperature fuel cells;
- FCH-02-5-2016 advanced monitoring, diagnostics and lifetime estimation for stationary solid oxide fuel cells stacks and modules;
- FCH-02-6-2016 development of cost effective manufacturing technologies for key components or fuel cell systems for industrial applications;
- FCH-02-7-2016 demonstration of large-scale rapid response electrolysis to provide grid balancing services and to supply hydrogen markets;
- FCH-02-8-2016 large scale demonstration of commercial fuel cells in the power range of 20-100kW in different market applications;
- FCH-02-9-2016 large scale demonstration of commercial fuel cells in the power range of 100-400kW in different market applications;

- FCH-02-10-2016 demonstration of fuel cell-based energy storage solutions for isolated micro-grid or off-grid remote areas;
- FCH-02-11-2016 megawatt or multi-MW demonstration of stationary fuel cells;
- FCH-03-1-2016 development of innovative hydrogen purification technology based on membrane systems;
- FCH-04-1-2016 novel education and training tools;
- FCH-04-2-2016 identification of legaladministrative barriers for the installation and operation of key fuel cells and hydrogen technologies.

Proposals must take the form of research and innovation actions, innovation actions or coordination and support actions, depending on the topic addressed. Research and innovation actions and innovation actions require participation by at least three legal entities, each established in a different EU member state or associated country. Coordination and support actions require at least one legal entity established in a member state or associated country.

The total budget is €117.5 million.

NNOVATIONS PARTNERSHIP SCHEME

Science and Technology Facilities Council

Description:

The Science and Technology Facilities Council invites applications for its innovations partnership scheme. This aims to transfer technology and expertise developed through STFC funding to the marketplace in partnership with industry and other academic disciplines.

Applicants must collaborate with a partner. Applicants must have been previously or be currently funded by the STFC, and should that their work will develop show technologies or expertise from STFC funded projects. Higher education institutions, research councils, the European Synchrotron Radiation Facility, CERN and the European Southern Observatory may apply as lead partners. Industrial and non-profit organisations may also apply in collaboration with a lead academic partner.

A maximum of £120,000 is available for mini IPS projects, and a maximum of £360,000 is available for standard IPS projects, which correspond to 80 per cent of full economic costs. Mini IPS projects have a duration of up to 12 months and standard IPS projects have a duration of three years.

Closing date: 04 May 16

*NDUSTRIAL RESEARCH CENTRES

Stiftelsen för Strategisk Forskning – Swedish Foundation for Strategic Research

Description:

The Swedish Foundation for Strategic Research invites proposals for its industrial research centres. Funding aims to boost longterm problem- and application driven research centres encompassing collaborative research ecosystems between industry, research institutes and academia. Centres should be strategically defined around formulated industrial needs with formidable research challenges, and research problems should be defined and pursued together by the industrial and academic partners. Research centres must be concentrated on innovation, disruptive including enabling technologies or emerging technology shifts in a long-term perspective.

Centres should consist of two to five industrial partners together with one to five academic or research institute partners. At least one of the partners must be a department at a Swedish university, which will administer the grant. The main applicant must be a researcher based at a Swedish university or research institute, and must be prepared to assume operative responsibility for the centre throughout the grant period. Co-applicants should be researchers from industry, public authorities, research institutes and university departments.

Companies should normally be registered in Sweden or close to Sweden so that the exchange can work practically and be justified strategically for Sweden. Industrial partners may be hospitals if the centre involves clinical research. International partners may participate on their own budget, excluding international researchers that become employed by the centre through participating Swedish partners.

The total budget is worth up to SEK400 million. Each centre may receive between SEK50m and SEK100m for a total period of six to eight years, including overheads. Up to eight centres will be supported.

Industry partners must fund their participation with a combination of in-kind and cash by at least 20 per cent of the total budget of the centre. A maximum of 25 per cent may be used for salaries for the main applicant or co-applicants. Funding may be used for salaries, research tools and running costs of the centre.

Closing date: 04 May 16

Deadline information: Proposals are invited between mid October 2015 and 2pm CET, 4

May 2016.

RITISH ACADEMY/LEVERHULME SMALL RESEARCH GRANTS

British Academy

Description:

The British Academy, in association with the Leverhulme Trust, invites applications for its small research grants. These support primary research in the humanities and social sciences.

Grants may be used to facilitate initial project planning and development, to support the direct costs of research and to enable the advancement of research through workshops or conferences, or visits by or to partner scholars.

Applications for individual and collaborative projects are equally welcome. International groups of scholars are eligible to apply, provided the lead applicant is a UK-based scholar.

Grants are tenable for up to two years and are worth between £500 and £10,000.

Closing date: 11 May 16

Deadline information: Applications due by 5pm. Deadlines on: 14 October 2015, 11 May

2016.

A Brit

NCIENT PERSIA FUND

British Academy

Description:

The British Academy invites applications to its ancient Persia fund. The aim of this fund is to encourage and support the study of ancient Persia and related areas, including central Asia, in the period before the coming of Islam. Activities supported by the fund include research grants for the study of ancient Iran and neighbouring areas, covering the travel costs of students and scholars.

For UK residents, an application to this fund for travel costs may be combined with an application for a small research grant for other costs, up to a total of £7,500. Applicants based outside the UK are not eligible to apply for additional support, but are welcome to apply for a travel grant up to the normal limit of £500. Grants are tenable for 12 months.

NDUSTRIAL PARTNERSHIP AWARDS

Biotechnology and Biological Sciences Research Council

Description:

The Biotechnology and Biological Sciences Research Council invites applications for its industrial partnership awards. These support science-led research projects that address any topic within the council's remit, and where industrial partners contribute in cash funding. Applications should be made to the following committees according to the research topic:

 research committee A evaluates proposals related to animal disease, health and welfare;

\aleph

- research committee B evaluates proposals related to plants, microbes, food and sustainability;
- research committee C evaluates proposals related to genes, development, and science, technology, engineering and mathematics approaches to biology;
- research committee D evaluates proposals related to molecules, cells and industrial biotechnology.

Principal applicants must be resident in the UK and hold an academic staff appointment, at the lecturer level or equivalent, at a higher education institution, research council institute or a BBSRC approved research organisation. Company partners should be registered in the UK or have a UK research and development or manufacturing site. Where a suitable company cannot be found in the UK, an overseas company may be used.

Industrial partners must contribute in cash at least 10 per cent of the full economic cost of projects. Awards are tenable for up to five years.

Closing date: 11 May 16

Deadline information: Applications due by 4pm.

2020-FETOPEN-2016 NOVEL IDEAS FOR RADICALLY NEW TECHNOLOGIES - TOPIC 2 Horizon 2020: Excellent Science

Description:

The European Commission Horizon 2020: Excellent Science, under the future and emerging technologies programme, invites proposals for its H2020-FETOPEN-2016 novel ideas for radically new technologies call. This aims to support the early stages of joint science and technology research for radically new future technological possibilities.

Proposals may address FETOPEN-02-2016 coordination and support actions.

Proposals should address only one of the following subtopics:

- a FET communication;
- b FET exchange;

- c FET conference;
- d FET innovation greenhouse.

For each of the scope items a and c at most one action will be funded.

Projects must take the form of coordination and support actions. These require participation by at least one independent legal entity, established in a member state or associated country. Under Excellent Science, Switzerland may participate as an associated country.

All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Each successful proposal is expected to receive between $\[\in \] 300,000$ and $\[\in \] 1$ million although proposals for other amounts will also be considered. The total indicative budget for this call is $\[\in \] 3m$.

Ref: OJ C6776.

OMING SOON: COMPARATIVE RESEARCH GRANTS

Network for Studies on Pensions, Ageing and Retirement

Description:

The Network for Studies on Pensions, Aging and Retirement will shortly be inviting applications for its comparative research grants. The next call will be expected in 2016. The following information is subject to change.

These are awarded to researchers not already receiving funding from Netspar. Proposals for research projects must be on topics that relate to the organisation's objective: to conduct innovative scientific research on all aspects of the economics of ageing. The maximum grant is €10,000 per project. Seven grants are available in this round.

Closing date: 12 May 16 (Forecast)

Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is

repeated once a year. Posted date: 14 Jan 15 Award type: Directed grants for individual investigators, Financial aid for postgraduate

students

RIGINAL, ISN'T IT?

VolkswagenStiftung – Volkswagen Foundation

Description:

The VolkswagenStiftung invites applications for its Original - Isn't it? funding opportunity. This aims to encourage scholars in the humanities and cultural studies to embark on projects of groundbreaking originality. There are no specific requirements as to what form this originality should take. There are two funding lines. Line one addresses individual researchers offering them a possibility to develop new ideas, hypotheses or topics in the form of an essay or treatise. Line two addresses researchers who wish to join small teams to follow up on new research ideas and put their feasibility to the test in an exploratory phase. Here, too, the main criterion is the potential for ground-breaking originality.

Applications are welcome from all researchers who have finished their PhD. Funding line one is only open to Germans, but teams under line two can include partners from both Germany and abroad. The number of researchers per group must not exceed four. Teams comprising partners drawn from the social sciences, life sciences, natural sciences or engineering are particularly welcome.

Funding available under line one is up to €80,000 over maximum one year. For teams the maximum funding is €150,000 over 18 months. A total of approximately 20 projects will be funded each year. The funding may be used for research stays, workshops, salary for employing a deputy during an additional research semester and translation costs.

Closing date: 12 May 16 (Forecast) Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

ONOR FROST FOUNDATION SMALL RESEARCH GRANTS

British Academy

Description:

The British Academy, in collaboration with the Honor Frost Foundation, invites applications for its small research grants. These support research in maritime archaeology and maritime cultural heritage. The grants are mainly intended to provide new funding opportunities within the UK for high quality research projects in maritime archaeology, and applicants do not need to adhere to the Honor Frost Foundation's regional focus.

Applications from international groups of scholars are welcome, provided there is a UK-based scholar as lead applicant.

Grants are worth up to £10,000 each.

Closing date: 11 May 16

Deadline information: Applications are invited between 1 April and 11 May 2016.

Posted date: 20 Oct 15

Award type: Directed grants for individual investigators, Directed grants to institutions,

research groups etc

OMING SOC Network for St

OMING SOON: COMPARATIVE RESEARCH GRANTS

Network for Studies on Pensions, Ageing and Retirement

Description:

The Network for Studies on Pensions, Aging and Retirement will shortly be inviting applications for its comparative research grants. The next call will be expected in 2016. The following information is subject to change.

These are awarded to researchers not already receiving funding from Netspar. Proposals for research projects must be on topics that relate to the organisation's objective: to conduct innovative scientific research on all aspects of the economics of ageing. The maximum grant

is €10,000 per project. Seven grants are available in this round.

Closing date: 12 May 16 (Forecast)
Deadline information: !! Call has not yet
been announced by funder, but this is the
approximate deadline we expect. This call is

repeated once a year. Posted date: 14 Jan 15

Award type: Directed grants for individual investigators, Financial aid for postgraduate

students

Award amount max: €10,000 Award budget total: €70,000

Description:

The VolkswagenStiftung invites applications for its Original - Isn't it? funding opportunity. This aims to encourage scholars in the humanities and cultural studies to embark on projects of groundbreaking originality. There are no specific requirements as to what form this originality should take. There are two funding lines. Line one addresses individual researchers offering them a possibility to develop new ideas, hypotheses or topics in the form of an essay or treatise. Line two addresses researchers who wish to join small teams to follow up on new research ideas and put their feasibility to the test in an exploratory phase. Here, too, the main criterion is the potential for ground-breaking originality.

Applications are welcome from all researchers who have finished their PhD. Funding line

one is only open to Germans, but teams under line two can include partners from both Germany and abroad. The number of researchers per group must not exceed four. Teams comprising partners drawn from the social sciences, life sciences, natural sciences or engineering are particularly welcome.

Funding available under line one is up to €80,000 over maximum one year. For teams the maximum funding is €150,000 over 18 months. A total of approximately 20 projects will be funded each year. The funding may be used for research stays, workshops, salary for employing a deputy during an additional research semester and translation costs.

Closing date: 12 May 16 (Forecast)

Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

ESEARCH GRANTS Horses and Humans Research Foundation

Description:

The Horses and Humans Research Foundation invites applications for its research grants. The purpose of HHRF funded research is to investigate the therapeutic effects of horses on humans. The broad research agenda includes basic research as well as clinical studies that will ultimately impact the physical and mental health and quality of life for people with disabilities who involved with equine-assisted activities/therapies.

Preference will be given to investigators with solid credentials and research experience.

Grants are generally worth up to \$50,000 for up to one year.

PECIAL PROGRAMME ON ISLAM, THE MODERN NATION STATE AND TRANSNATIONAL MOVEMENTS - RESEARCH PROJECTS

Gerda Henkel Foundation

Description:

The Gerda Henkel Foundation invites proposals for its special programme on Islam, the modern nation state and transnational movements. The programme is aimed at researchers who, with an eye to current developments, are examining the emergence of political movements in the Islamic world at the national or transnational level. Funding supports research projects in the following fields:

- historical and present-day Islamic systems of society and state;
- the concept of nation, national movements and nationalism in Islamic civilisation;
- Islamic fundamentalism or Islamic emancipation;
- transnational civil society movements in the Islamic world;
- Islamic states in the international world system.

Applications may be submitted by one or more PhDs or scholars with postdoctoral lecture qualifications, or by universities or other research institutes.

Grants cover costs for personnel, travel, materials or other expenses. The costs of hosting visiting scholars may also be financed.

Closing date: 27 May 16

Deadline information: This call is repeated

once a year.

Posted date: 10 Jul 15

Description:

The Society for Endocrinology invites applications for its early career grant. This provides financial support to endocrinologists for resources to gain preliminary data before applying for other external funding, for resources to finalise a project or for short-term salary funding. The grant also incorporates from the Marjorie funding Robinson endowment fund for research into diseases of the adrenal or pituitary glands.

Members of the society who are within 10 years of completion of a postgraduate degree may apply. Applicants should normally be postdoctoral or, in exceptional cases, within the final year of a PhD in which the project must be distinct from that done during their PhD. Full, associate and nurse members who hold a minimum of one year's membership, and scientist-in-training and clinician-intraining members who hold a minimum of six month's membership, may also apply. Applicants should normally be an academic or academic-related staff member based at a recognised higher education or medical institution. If not, a letter of support is required from the principal investigator or clinical team leader. The grant is ideally suited to trainee members.

The grant is worth up to £10,000.

Closing date: 27 May 16

Deadline information: Required signed copies due within a week of each deadline. Deadlines on: 27 May 2016, 27 November 2016.

PECIAL PROGRAMME ON ISLAM, THE MODERN NATION STATE AND TRANSNATIONAL MOVEMENTS - RESEARCH SCHOLARSHIPS Gerda Henkel Foundation

Description:

The Gerda Henkel Foundation invites proposals for research scholarships under its special programme on Islam, the modern nation state and transnational movements. This supports researchers who are examining the emergence of political movements in the Islamic world at the national or transnational level. Research may address:

- historical and present-day Islamic systems of society and state;
- the concept of nation, national movements and nationalism in Islamic civilisation;
- Islamic fundamentalism or Islamic emancipation;
- transnational civil society movements in the Islamic world;
- Islamic states in the international world system.

Each applicant must hold a PhD or be a scholar with a postdoctoral lecture qualification. Scholarships each support a scholar who will work on their own specific project.

Funding provides a basic scholarship sum. If appropriate and required, it may also cover travel abroad and other travel expenses, childcare allowance, and material expenses. Projects are generally funded for one to 24 months.

Closing date: 27 May 16

ISITING SCHOLARS AND CONSULTANTS GRANTS FOR INSTITUTES IN DEVELOPING COUNTRIES

Abdus Salam International Centre for Theoretical Physics

Description:

The Abdus Salam International Centre for Theoretical Physics invites applications for its visiting scholars and consultants grants for institutes in developing countries. Funding provides assistance to institutes or research groups in developing countries requiring expert advice to enhance existing activities or to initiate a new research programme. The aim is to establish a permanent link between an outside expert in a field of physics or mathematics and the applicant institute.

Applications may be submitted by host institutions in developing countries. The visiting scientist should be an established researcher who makes a commitment to visit the host institution two or three times, with visits lasting approximately one month each, over a period of three years.

Grants cover the travel costs of the visiting scientist and do not normally exceed €2,500 per visit.

Closing date: 31 May 16

SB MOBILITY AWARD FOR YOUNG RESEARCHERS European Society of Biomechanics

Description:

The European Society of Biomechanics invites applications for its mobility award for young researchers. This provides financial assistance for collaborative research in a foreign country as part of a PhD or early postdoctoral research.

Applicants must be either PhD students enrolled at a university or a research institute,

or postdoctoral researchers with less than one year after receiving their PhD degree. Both the applicant and the scientist responsible at the foreign lab must be ESB members in good standing. The lab visit should be to another country than where the student is enrolled for his or her PhD studies or postdoctoral research.

Two awards, worth up to €4,000 each, are available for research visits of two to six months' duration. Funding may be used towards travel costs, living expenses and potential project related costs.

ATHILDE TAGGER PRIZE FOR GENEALOGICAL RESEARCH

National Library of Israel

Description:

The International Institute for Jewish genealogy at the National Library of Israel, invites applications for the Mathilde Tagger prize for genealogical research. This recognises a research study in the field of Jewish genealogy that has been completed but not yet published. The aim of the prize is to assist the recipients to have their work published in an appropriate scholarly framework.

The research may be conducted by a single researcher or a group of researchers. Preference will be given to original research in areas of broad interest to family historians and scholars working on Jewish genealogy and a range of related areas in the humanities and social sciences.

The prize is worth US\$5,000.

Closing date: 31 May 16 (Forecast)

Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

IGHLIGHT NOTICE FOR INTERNATIONAL DEVELOPMENT - RESEARCH NETWORKING SCHEME

Arts and Humanities Research Council

Description:

The Arts and Humanities Research Council, under its research networking scheme, invites applications for the highlight notice for international development. This aims to encourage research networking proposals which explore the contribution that arts and humanities research can play in debates about international development and to the UN 2030 agenda for sustainable development. It also seeks to support the development of international boundary crossing collaborations with countries which receive Official Development Assistance (ODA) or with organisations which play an important role in supporting international development.

Proposals must be led by a UK principal investigator and principal investigators must come from a discipline in the arts and humanities. Only one co-investigator is permissible; international co-investigators are eligible under this scheme. In addition to these ordinary requirements for the research networking scheme, proposals under the highlight notice must demonstrate support for the development of significant collaborations with researchers or non-academic partners in at least one of the 146 countries which are ODA recipients, or with relevant international organisations with remits that include supporting development in ODA recipient countries. These could be overseas academic co-investigators, project partners or project collaborators as appropriate but should play a significant role in the development of the network beyond participation in events.

Grants are worth up to £30,000 each over two years. An additional £15,000 full economic cost may be provided to cover the costs of any international participants or activities in addition to the scheme limit.

Closing date: 31 May 16

Deadline information: Applications due by 12 midnight. Proposals relevant to this notice will be accepted after the deadline but will not be eligible for supplementary funding or have an increased chance of funding.

Posted date: 22 Jan 16

Award type: Networking/collaboration,
Directed grants for individual investigators,
Travel to conferences, meetings etc.,
Directed grants to institutions, research
groups etc, Hosting conferences
Award amount max: £45,000

Description:

The Arts and Humanities Research council invites applications to its highlight notice for international development under the followon fund for impact and engagement. This aims to encourage applications exploring innovative ways to enhance engagement with, and impacts from, research funded by the AHRC in one or more countries which receive Official Development Assistance (ODA) or which will contribute more broadly to international development. Funds awarded for knowledge exchange, public engagement, dissemination and commercialisation activities that arise unforeseeably during the lifespan of, or following, an AHRC funded project. The scheme does not support supplementary funding for continuation of research activities or substantively new projects.

Proposals must be based on either previous or current research directly funded by the AHRC, or on research that has been cofunded with another UK research council. The project must be led by the original principal investigator. International researchers may act as co-investigators. In addition to these ordinary requirements for the follow-on fund for impact and engagement, proposals under the highlight notice must demonstrate

support for the development of significant collaborations with researchers or non-academic partners in at least one of the 146 countries which are ODA recipients, or with relevant international organisations with remits that include supporting development in ODA recipient countries.

Grants are worth up to £100,000 over a maximum period of one year. Smaller grants of up to £30,000 may be awarded for shorter or higher risk activities.

JUNE 2016

LINICAL RESEARCH GRANTS Cystic Fibrosis Foundation

Description:

The Cystic Fibrosis Foundation invites applications for its clinical research grants. These support clinical research projects directly related to cystic fibrosis treatment and care. Projects may address diagnostic or therapeutic methods related to cystic fibrosis or the pathophysiology of cystic fibrosis and applicants must demonstrate access to appropriate controls and to a sufficient number of cystic fibrosis patients from accredited care centres.

Single-centre clinical research grants are worth up to US\$100,000 per year for a period of up to three years. Multi-centre clinical research grants are worth up to US\$225,000 per year for a period of up to three years. In addition, up to eight per cent may be awarded for indirect costs under either grant.

Closing date: 01 Jun 16

Deadline information: Letters of intent due by 5pm EDT. Deadlines on: 1 June 2016, 1 December 2016, and repeated annually.

'NTERNATIONAL COLLABORATIVE RESEARCH GRANTS

Wenner-Gren Foundation for Anthropological Research

Description:

The Wenner-Gren Foundation for Anthropological Research invites applications for its international collaborative research grants. These support international research collaborations between two or more qualified scholars, where the principal investigators bring together different and complementary perspectives, knowledge or skills. The aims are to contribute to the development of an international anthropology that values and incorporates different national perspectives and resources, and to help to build capacity in countries where anthropology may be underrepresented.

Proposals must involve collaboration between researchers of different nationalities who are working in different countries. Principal researchers must hold a doctorate or equivalent qualification in anthropology or a related discipline.

Grants are worth up to US\$30,000 each. However, proposals that include a training element may receive up to US\$35,000, of which no more than US\$10,000 can be used for training purposes.

Closing date: 01 Jun 16 Deadline information: Applications can only be made within three months of the application deadline. Deadlines on: 1 June 2016, 1 December 2016, and repeated annually. Posted date: 03 Dec 14

XTENDED DEADLINE: LICHTENBERG PROFESSORSHIPS

VolkswagenStiftung – Volkswagen Foundation

Description:

The VolkswagenStiftung has extended the closing date for the Lichtenberg professorships. The previous deadline of 31 May has been extended to 1 June 2016. All other call details remain unchanged.

These professorships offer young researchers a tenure track option at a German university of their choice, and an opportunity to implement new teaching concepts and carry out independent long term research in highly innovative areas at the interface of disciplines. There are no thematic restrictions.

Applicants may be researchers of any nationality, however the host institution must be a university based in Germany. Candidates must have either obtained a PhD no more than four years ago and had a change of academic environment and location, at the latest upon appointment to the professorship, or obtained a PhD no more than seven years ago and be returnees or coming to Germany from abroad, as well as had a change of academic environment within the last five years, at the latest upon appointment to the professorship.

Up to seven professorships are available, each worth between €800,000 and €1.5 million for a period of five years.

Closing date: 01 Jun 16

Deadline information: This call is repeated

once a year.

R

ESEARCH GRANTS PROGRAMME IN BASIC SCIENCES

TWAS

Description:

The World Academy of Sciences invites applications for its research grants programme in basic sciences. This supports the purchase of research facilities required to enhance productivity of projects in biology, chemistry, mathematics and physics in science- and technology-lagging countries.

Individual applicants should be developing-country nationals under 45 years of age, who hold a PhD and have some research experience but are at the beginning of their career. Individual applicants should hold a position at a university or research institution in an S&T-lagging country.

Applications from research units must be led by a developing-country national of any age who holds a PhD and has good research experience. The research unit should include at least two PhD-qualified researchers and a number of PhD and MSc students and technicians.

Applications from research consortia must be led by a developing-country national of any age who holds a PhD and has good research experience. Each member of the consortium should operate in a university or research institution in an S&T-lagging country.

Women scientists are especially encouraged to apply.

Grants are worth up to £15,000 for individuals, up to £30,000 for research units, and up to £20,000 for consortia. Grants are provided for a period of 18 months.

Closing date: 01 Jun 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

ACCINOLOGY IN AFRICA MASTER'S LEVEL COURSE Jenner Institute

Description:

The Jenner Institute, in collaboration with the Malaria Research and Training Centre, Centre d'Infectiologie Charles Mérieux and the Fondation Mérieux, invites applications for bursaries for its vaccinology in Africa master's level course, to be held in Bamako, Mali, from 5 to 9 October 2015. This covers the main aspects of vaccinology, the vaccine development process, biomanufacturing, clinical trials, and regulatory and ethical issues.

Students, researchers and professionals resident in West and Central Africa may apply. Delegate numbers are limited to a maximum of 40 participants, which include 20 local residents of Mali and 20 participants living within the region of West and Central Africa.

Bursaries for local residents of Mali cover course fees, accommodation and meals during the course. Bursaries for those living further afield also include travel expenses.

Closing date: 01 Jun 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect.

Applications due by 5pm BST. This call is repeated once a year.

REEN TAL Bundesminis

REEN TALENTS COMPETITION

Bundesministerium für Bildung und Forschung – German Federal Ministry of Education and Research

Description:

The German Federal Ministry of Education and Research (BMBF) invites applications for its green talents competition. This supports young scientists, working on sustainable development, to visit Germany for a two-week science forum followed by a fully funded research stay for up to three months.

The winners will be able to visit Germany's leading institutions, in order to gather information and learn about the options for cooperation with German partners as part of a science forum and, in the following year, be invited to return to Germany for up to three months, to conduct research and establish partnerships.

Applicants must be non-German citizens and reside outside Germany, be currently enrolled in or have completed a master's degree programme or higher with significantly above average grades, have a strong command of English and be no more than 32 years of age.

Both visits to Germany are fully financed by the BMBF. 25 awards are available.

Closing date: 02 Jun 16 (Forecast)
Deadline information: !! Call has not yet
been announced by funder, but this is the
approximate deadline we expect.
Applications due by 12 noon, CET. This call
is repeated once a year.

ESEARCH GRANTS PROGRAM

CFIDS Association of America

Description:

The Chronic Fatigue and Immune Deficiency Syndrome Association of America invites applications for its research grants. These grants seek to advance objective diagnosis and effective treatment of CFS. Of particular interest are:

- proposals that leverage existing resources and infrastructures, including but not limited to the SolveCFS BioBank, for subject enrollment and sample collection;
- proposals with robust biomarkers requiring validation and investigational therapeutics or offlabel treatments with strong potential to enhance clinical practice for CFS.

The CFIDS Association of America intends to commit approximately \$600,000 for award of successful applications responsive to this announcement. Applicants may request a project period of up to 18 months and maximum total budget of \$100,000 including direct costs and indirect costs. Applications may be submitted by nonprofit, public and commercial institutions with no restrictions as to geographic location.

Closing date: 03 Jun 16 (Forecast)

ENTRES OF EXCELLENCE

Danmarks Grundforskningsfond - Danish National Research Foundation

Description:

The Danish National Research Foundation invites outline proposals for its call for centres of excellence. These aim to strengthen Danish research by providing the best possible working conditions and organisational set-up for selected researchers across the areas of humanities, life sciences, natural sciences, social sciences and technical sciences. Centres of excellence consist of units based at research institutions sharing a common idea or vision, and an overall and clearly defined set of research objectives. The foundation welcomes outstanding research of a high international standard.

Applications may be for proposed centres whose research idea is ambitious and original, whose proposed leader has a high standing in the international scientific community, who include high-quality personnel aiming to establish a creative and dynamic international research environment, and whose focus, structure and size is not feasible within conventional funding. Centres are encouraged to collaborate with leading international researchers, and to include employees and visitors from abroad.

Grants may cover expenses for salaries, PhD students, postdoctoral staff, visiting staff, technical and administrative staff, travel costs and conferences, operational costs and equipment and overhead. Salaries for permanent staff are generally not funded. The

size of grants vary, but can be granted for up to 10 years.

Closing date: 06 Jun 16

Deadline information: Outline proposals

MALL RESEARCH PUMP PRIMING GRANTS Royal College of Surgeons of Edinburgh

Description:

The Royal College of Surgeons of Edinburgh invites proposals for its small research pump priming grants. These support pump priming research projects in one of the following priority areas:

- surgical and dental translational research;
- surgical and dental health services research;

- research into surgical and dental aspects of patient safety, simulation and non-operative technical skills;
- cancer research of demonstrable direct clinical relevance to the management of solid tumours.

Research may be undertaken in the UK or overseas. Applicants should be surgical trainees or recently appointed consultants. The principal applicant must be a member or a fellow of the college in good standing.

Grants are worth up to £10,000 each for a period of one year. They may not be used for personal salary costs, travel or the acquisition of computing facilities.

AREER CATALYST RESEARCH GRANTS FOR BASIC AND TRANSLATIONAL RESEARCH

Susan G Komen for the Cure

Description:

Susan G Komen for the Cure invites preapplications for its career catalyst research grants for basic and translational research. These provide support for hypothesis-driven research that has significant potential to advance the understanding of breast cancer and lead to reductions in breast cancer incidence or mortality.

Research projects may be laboratory- or field based. Projects involving clinical trial samples for a study in conjunction with a clinician that does not involve direct patient interaction are also allowed.

Principal investigators must hold a doctoral degree and faculty appointment, with the requirement that they have not held any faculty appointment, including non-tenure and tenure-track appointments combined, for more than six years. A lead mentor who holds full-time faculty appointment with a nonprofit institution or organisation anywhere in the world must be identified. The research must be conducted at the lead mentor's institution. There no citizenship are requirements.

Each grant is worth up to US\$150,000 per year for up to three years. Funding may be used to cover salary, equipment costs, travel costs, publication costs, meeting-related poster printing costs, and reasonable coursework and training expenses. Indirect costs that do not exceed 25 per cent of the direct costs are allowed.

G

RADUATE TRAINING IN DISPARITIES RESEARCH GRANTS

Susan G Komen for the Cure

Description:

Susan G Komen for the Cure invites preapplications for its graduate training in disparities research grants. These aim to establish or sustain a training programme for graduate students who are seeking careers dedicated to understanding and eliminating disparities in breast cancer outcomes across population groups. The programme should empower the students with the skills and knowledge necessary to effectively explore the causes of differential breast cancer outcomes and interventions to reduce and eliminate such disparities.

The principal applicant must have a doctoral degree and a full-time faculty appointment with an accredited non-profit institution or organisation. A minimum of three trainees, each of which must be enrolled in a master's or doctoral degree programme, must be identified for the grant. Trainees from populations affected by disparities in breast cancer outcomes are strongly preferred. There are no citizenship requirements.

Each grant is worth up to US\$135,000 per year for up to three years. Funding may be used to cover trainee stipends, mentors' salaries, training materials, travel to annual trainee meeting and other associated training costs. Indirect costs are not allowed.

Closing date: 17 Jun 16 (Forecast)

2020-INFRADEV-2016 DEVELOPMENT AND LONG TERM SUSTAINABILITY OF NEW PAN-EUROPEAN RESEARCH INFRASTRUCTURE - TOPIC 2, 4 Horizon 2020: Excellent Science

Description:

The European Commission Horizon 2020: Excellent Science, under its European research infrastructures programmes, invites proposals for its H2020-INFRADEV-2016 development and long term sustainability of new paneuropean research infrastructures call. Proposals may address the following topics:

- INFRADEV-2-2016 preperatory phase of ESFRI projects;
- INFRADEV-4-2016 European open science cloud for research.

Projects must take the form of research and innovation actions or coordination and support actions. Research and innovation actions require participation by at least three legal entities, each established in a different EU member state or associated country. Coordination and support actions require participation by at least one legal entity established in a member state or associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia. Under Excellent Science, Switzerland may participate as an associated country.

The indicative budget for this call is €50 million. Each successful proposal is expected to receive up to €4m, although proposals for other amounts will also be considered.

ISTINGUISHED INNOVATOR AWARDS

Lupus Research Institute

Description:

The Lupus Research Institute invites applications for its distinguished innovator awards. These provide support to conduct novel research into the fundamental causes of lupus and so provide new directions toward a cure or prevention.

Novel, hypothesis or discovery-driven proposals in human or animal model based lupus research are welcome. Proposals must aim to uncover the fundamental causes of lupus and present a compelling vision of how the discovery would lay the groundwork for a potential cure, prevention or highly effective therapy.

Applicants must hold a position at an academic institution. Applications are encouraged from investigators world wide in diverse disciplines including immunology, genetics, molecular, cell and systems biology. Scientists who have not previously worked in lupus before are also eligible to apply.

Awards provide up to US\$250,000 per year for up to four years. Up to four awards will be made.

Closing date: 25 Jun 16 (Forecast)

NNOVATOR GRANTS

National Breast Cancer Foundation

Description:

The National Breast Cancer Foundation invites applications for its innovator grants.

These support projects that challenge existing paradigms or break new theoretical ground in

the field of breast cancer. Funding is provided to pursue serendipitous observations and explore novel, untested ideas which are potentially beneficial but high-risk avenues of investigation in breast cancer, to provide proof-of-principle data to answer feasibility questions regarding the basic premise of future grant applications.

Projects should be new and develop novel ideas that deviate from established lines of investigation. Existing projects are not eligible.

The proposed project must be located, managed and operated under the auspices of a university, hospital or major research institution located within Australia. The chief investigators must reside in Australia throughout the funding period, be Australian citizens, have resident status or appropriate work visa, and be actively engaged in research in Australia. They must have a PhD in a health-related field of research or be medically qualified, and should not hold more than four NBCF grants in total at any one time. There are no restrictions on individuals who may be named as an associate investigator, but they are not eligible to receive any direct funds from the grant. Multidisciplinary and multi-institutional collaborations are encouraged, applications that bring new researchers to breast cancer.

Grants are worth up to AU\$100,000 per year for up to two years.

Closing date: 26 Jun 16 (Forecast)
Deadline information: !! Call has not yet

OMING SOON: RAAK-PUBLIC

Netherlands Organisation For Scientific Research – Nederlandse Organisatie Voor Wetenschappelijk
Onderzoek

Description:

The Netherlands Organisation for Scientific Research (NWO), under the National Taskforce for Practice Based Research (SIA) will shortly inviting applications for its RAAK-public scheme. The expected deadline is 28 June 2016. The information below is taken from the previous call and subject to change.

This scheme aims to stimulate the research at of applied development universities of applied sciences (HBO) and promotes cooperation between professionals working in the public sector and universities of applied sciences. The focus of the collaboration is on knowledge development application, resulting in practical knowledge for the professional practice and providing a demonstrable contribution to the renewal of higher vocational education.the renewal of higher vocational education.

Only consortia of a government-funded university of applied sciences and at least one public partner are eligible to apply. One or more private partners may act as coapplicants.

The total available budget for this round is €4.5 million.

Grants are worth up to €300,000 each for a duration of 18 to 24 months. Participants must contribute at least 50 per cent of the total project costs, either in cash or in kind.

ON Na

OMING SOON: CLINICAL RESEARCH POSTGRADUATE SCHOLARSHIPS

National Health and Medical Research Council

Description:

The National Health and Medical Research Council will shortly be inviting applications for its clinical research postgraduate scholarships. Applications for this call will open on 27 April and close on 29 June 2016. The following information is subject to change and refers to the previous call.

These scholarships provide support to combined MBBS and PhS students, and medical or dental graduates undertaking a postgraduate degree in any relevant health-related discipline, including the social and behavioural sciences.

For this year, electromagnetic energy research has been identified as a special interest area of the NHMRC. Applications are particularly encouraged from researchers wishing to build capacity in research knowledge to ascertain health effects of electromagnetic emissions.

Applicants must be Australian citizens or permanent residents, or New Zealand citizens who have special category visa status and are based in Australia for at least 80 per cent of the duration of the award. In addition, applicants should be one of the following:

- students currently enrolled in a combined MBBS or PhD programme;
- Australian citizens who are medical or dental graduates currently registered

to practise within Australia at the time of application;

- medical graduates during their intern year;
- dental graduates prior to graduation, provided that evidence of high quality work is shown;
- medical or dental graduates from overseas who are currently registered to practise in Australia.

Full-time PhD scholarships last from one to three years and full-time master's scholarships last from one to two years. Parttime scholarships can be held for up to six years. All projects must be based in Australia.

Stipends are worth up to AU\$38,488 per year. Additional allowances include up to AU\$2,250 per year for travel and consumables, AU\$500 for thesis presentation costs and AU\$1,385 for costs for relocation within Australia.

Closing date: 29 Jun 16

Deadline information: Applications are invited between 27 April and 29 June 2016.

This call is repeated once a year.

Posted date: 07 Jul 15

OMING SOON: PUBLIC HEALTH AND HEALTH SERVICES POSTGRADUATE RESEARCH SCHOLARSHIPS

National Health and Medical Research Council

Description:

The National Health and Medical Research Council will shortly be inviting applications for its public health and health services postgraduate research scholarships. Applications for this call will open between 27 April and 29 June 2016. The following information is subject of change, and refers to the previous call.

These encourage graduates to obtain formal training in public health research in any relevant health-related discipline including the social and behavioural sciences, health policy, health services, epidemiology and health economics. For this year, electromagnetic energy research has been identified as a special interest area of the

NHMRC and thus encourages applicants wishing to build capacity in research knowledge to ascertain health effects of electromagnetic emissions.

Each Applicant must be an Australian citizen or permanent resident, or a New Zealand citizen with special category visa status and must be based in Australia for at least 80 per cent of the duration of the award. Moreover, the following applicants are eligible:

- Australian citizens who have already completed a degree in an area applicable to public health research at the time of application;
- Australian citizens who are medical or dental graduates currently registered to practice within Australia;
- health related graduates in areas applicable to public health who are from overseas;
- medical or dental graduates from overseas who are currently registered to practice in Australia.

Full-time PhD scholarships are awarded from one to three years and full-time master's scholarships are awarded for one to two years.

Stipends are worth either AU\$25,850 or AU\$33,318 or AU\$38,488 per year, depending on the applicant's credentials. Additional allowances include up to AU\$2,250 per year for travel and consumables, AU\$500 for thesis

presentation costs and AU\$1,385 for costs for relocation within Australia.

Closing date: 29 Jun 16

Deadline information: Applications are invited between 27 April and 5pm AEST, 29 June 2016. This call is repeated once a year.

ESEARCH GRANTS Northern Nut Growers Association

Description:

The Northern Nut Growers Association invites applications for its research grants.

Grants are offered to those institutions or individuals doing research on temperate zone

tree nuts. Any topic dealing with temperate zone tree nuts is eligible. Projects are favored that are no more than two years in duration and require no more than US\$5,000 from the NNGA. Suggested topics include:

- propagation;
- germplasm and cultivar evaluation;
- pest management and pest biology;
- mechanical harvesting;
- postharvest handling and processing;
- orchard establishment;
- orchard care and maintenance;
- marketing;
- basic biology and ecology;
- foreign exchange, especially germplasm.

Anyone who has an interest and capability to perform research is eligible. This includes NNGA members, academic professionals, private individuals, and corporations.

NTER MOBILITY PROGRAMME
National Research Fund Luxembourg

Description:

The National Research Fund Luxembourg invites applications for funding under its INTER mobility programme. This promotes scientific exchange between research groups based at the Luxembourg public research

institutions and research groups from abroad in order to foster innovative, internationally competitive research and knowledge exchange. The programme enables postdoctoral and senior researchers working

in Luxembourg visit a leading research institution in the field, or the visit of established senior researchers in Luxembourg public research institutions.

The beneficiary has to be a Luxembourg public institution, an administration or a public service authorised to undertake R&D activities or technology transfer in their fields of activity. The exchange must take place between a Luxembourg public research institution and a foreign public or private institution. The researcher must be employed as a researcher by their home institution before, during, and after the visit. The secondment has to be carried out in a different country from where the fellow has been principally working in the two years preceding the call deadline. Early-stage researchers, such as PhD candidates, are not eligible.

Visits may last between six weeks and one year. Grants cover salary costs for the researcher, travel costs for researcher and family, a mobility allowance of $\in 1,000$ per month, or $\in 1,500$ per month for a researcher with family charges, and other costs, including visa and additional health insurance.

Closing date: 30 Jun 16

Deadline information: Applications due by 20 January and 30 June, or next working day,

annually.

2020-INNOSUP-2016 FOR A BETTER INNOVATION SUPPORT TO SMES - TOPIC 2
Horizon 2020: Industrial Leadership

Description:

The European Commission Horizon 2020: Industrial Leadership, under the Innovation in SMEs work programme, invites proposals for its H2020-INNOSUP-2016 for a better innovation support to SMEs call. Proposals must address the topic INNOSUP-02-2016 European SME innovation associate – pilot. This pilot is an innovation capacity building action to provide at European level a grant to visionary SMEs which have experienced difficulty in recruiting the relevant skills nationally.

Only applications from SMEs established in the EU member sates or countries associated to Horizon 2020 are eligible.

Proposals must take the form of coordination and support actions. These require participation by at least one legal entity established in a different EU member state or associated country. The associate must be a PhD holder, have expertise in line with the job advertisement and transnational mobility as

defined in the mobility rule of the Marie Slodowska Curie Actions. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

It is expected that up to 90 assignments will be supported. The total indicative budget for this call is \in 7.2 million.

Ref: OJ C6776.

Closing date: 30 Jun 16

Deadline information: Proposals invited between 11 February and 5pm Brussels time,

30 June 2016.

Small & Medium-Sized Enterprises

Description:

The Arts and Humanities Research Council, under its research networking scheme, invites applications for the highlight notice for the UN international decade for people of African descent. This aims to encourage research networking proposals which are relevant to the UN international decade for people of African descent. The UN cites the need to strengthen national, regional and international co-operation in relation to the full enjoyment of economic, social, cultural, civil and political rights by people of African descent, and their full and equal participation in all aspects of society. The theme for the international decade is People of African descent: recognition, justice and development, and the main objectives are as follows:

- promote respect, protection fulfilment of all human rights and fundamental freedoms by people of African descent, as recognised in the Universal Declaration of Human Rights;
- promote a greater knowledge of and respect for the diverse heritage, culture and contribution of people of African descent to the development of societies;
- adopt and strengthen national, regional and international legal

frameworks according to the Durban declaration and programme of action and the international convention on the elimination of all forms of racial discrimination and to ensure their full and effective implementation.

Proposals must be led by a UK principal investigator and principal investigators must come from a discipline in the arts and humanities. Only one co-investigator is permissible; international co-investigators are eligible under this scheme. In addition to these ordinary requirements for the research networking scheme, proposals under the highlight notice must demonstrate a core arts and humanities research focus on issues of specific relevance to people of African descent or the international decade for people of African descent and engagement with, or the participation of, researchers or communities African descent or with relevant community, cultural, heritage, creative or professional organisations relevant or providers of community services.

Grants are worth up to £30,000 each over two years. An additional £15,000 full economic cost may be provided to cover the costs of any international participants or activities in addition to the scheme limit.

Closing date: 30 Jun 16

Deadline information: Applications due by 12 midnight. Proposals relevant to this notice will be accepted after the deadline but will not be eligible for supplementary funding or have an increased chance of

funding.
